Preface

Technological advances in the use of Artificial Intelligence for educational applications over the past two decades have enabled the development of highly effective, deployable learning technologies that support learners across a wide-range of domains and age-groups. Alongside, mass access and adoption of revolutionary communication technologies have made it possible to bridge learners and educators across spatio-temporal divides. On the other hand, research in collaborative learning has informed instructional principles that leverage the pedagogical benefits of learning in groups. Educational service providers including mainstream universities are deploying their courses to online learning platforms that allow students to share their learning experience with their peers. Large volumes of educational content including videos, presentations, books and games are accessible on mobile/tablet devices which enrich learning interactions by bringing students together.

Over the past few years, the AIEd research community has started investigating extension of fundamental techniques (such as student modeling, model-based tutors, integrated assessment, tutorial dialog, automated scaffolding, data mining, pedagogical agents) to support learning in groups. The goal of this series of workshops is to provide a focused forum for bringing this sub-community of AIEd researchers together to share recent advances in the field.

Building on its first instantiation in 2012, this workshop will comprise of presentations describing advances in state of the art AIEd techniques to improve the effectiveness of learning in groups. Five full length papers and six short papers were accepted for presentation this year. These eleven papers are organized into four interrelated areas that cover the breadth of the topics of interest. Additionally, two positions papers accepted to this workshop are included in these proceedings. Besides the paper presentations, the workshop will include a group discussion session. After the workshop, notes from this session, will be shared on the workshop website.

June, 2013

Rohit Kumar, Jihie Kim
Organizers

Jihie Kim  
University of Southern California, USA (jihie@isi.edu)
Rohit Kumar  
Raytheon BBN Technologies, USA (rkumar@bbn.com)

Advisors

Arthur C. Graesser  
University of Memphis, USA
Lewis W. Johnson  
Alelo Inc., USA
James C. Lester  
North Carolina State University, USA
Carolyn P. Rosé  
Carnegie Mellon University, USA
Beverly P. Woolf  
University of Massachusetts Amherst, USA

Program Committee

Ari Bader-Natal  
Minerva Project, USA
Ryan S.J.d Baker  
Columbia University, USA
Kristy Boyer  
North Carolina State University, USA
Stavros N. Demetriadis  
Aristotle University of Thessaloniki, Greece
Toby Dragon  
Saarland University, Germany
Gahgene Gweon  
Korea Advanced Institute of Science and Technology, S. Korea
Sharon I-Han Hsiao  
Columbia University, USA
Charalampos  
University of Thessaly, Greece
Karagiannidis
Judy Kay  
University of Sydney, Australia
Fazel Keshtkar  
University of Memphis, USA
Diane Litman  
University of Pittsburgh, USA
Bruce M. McLaren  
Carnegie Mellon University, USA
Saarland University, Germany
Elaine Raybourn  
Sandia National Labs, USA
Oliver Scheuer  
Saarland University, Germany
Erin Walker  
Arizona State University, USA

Additional Reviewers

Tiffany Barnes  
University of North Carolina at Charlotte, USA
# Table of Contents

## Tools & Techniques

**Authoring Collaborative Intelligent Tutoring Systems**
*Jennifer Olsen, Daniel Belenky, Vincent Aleven, Nikol Rummel, Jonathan Sewall and Michael Ringenberg*

**A Data Mining Approach to Construct Production Rules in an Educational Game**
*Fazel Keshtkar, Borhan Samei, Brent Morgan and Art Graesser*

## Modeling & Analysis

**Modeling the Process of Online Q&A Discussions using a Dialogue State Model**
*Shitian Shen and Jihie Kim*

**Extending Collaborative Learning Modeling with Emotional Information**
*Olga C. Santos, Jesus G. Boticario, Raúl Cabestrero and Pilar Quirós*

**Analysis of Emotion and Engagement in a STEM Alternate Reality Game**
*Yu-Han Chang, Rajiv Maheswaran, Jihie Kim and Linwei Zhu*

## Visualization

**A Dashboard for Visualizing Deliberative Dialogue in Online Learning**
*Tom Murray, Leah Wing and Beverly Park Woolf*

**Designing OLMs for Reflection about Group Brainstorming at Interactive Tabletops**
*Andrew Clayphan, Roberto Martinez Maldonado and Judy Kay*

**Encouraging Online Student Reading with Social Visualization**
*Julio Guerra, Denis Parra and Peter Brusilovsky*

## Interactive Systems

**Academically Productive Talk: One Size Does Not Fit All**
*David Adamson and Carolyn Rose*

**Towards Supporting ‘Learning To Learn Together’ in the Metafora platform**
*Manolis Mavrikis, Toby Dragon, Nikoleta Yiannoutsou and Bruce M. McLaren*

**Supporting Collaborative Learning in Virtual Worlds by Intelligent Pedagogical Agents: Approach and Perspectives**
*Mohamed Soliman*
Position Papers

Towards semantic descriptions of collaboration indicators to support collaboration models transferability  
*Jesús L. Lobo, Olga C. Santos and Jesús G. Boticario*

Scripting at the tabletop to improve collaboration  
*Andrew Clayphan*
