AIED Workshop on Simulated Learners

Workshop Co-Chairs:

Gord McCalla  
Department of Computer Science, University of Saskatchewan

John Champaign  
RELATE, Massachusetts Institute of Technology

https://sites.google.com/site/aiedwsl/
Preface

This workshop is intended to bring together researchers who are interested in simulated learners, whatever their role in the design, development, deployment, or evaluation of learning systems. Its novel aspect is that it isn’t just a workshop about pedagogical agents, but is also concerned about other roles for simulated learners in helping system designers, teachers, instructional designers, etc. As learning environments become increasingly complex and are used by growing numbers of learners (sometimes in the hundreds of thousands) and apply to a larger range of domains, the need for simulated learners (and simulation more generally) is compelling, not only to enhance these environments with artificial agents, but also to explore design issues using simulation that would be otherwise too expensive, too time consuming, or even impossible using human subjects. The workshop aims to be broadly integrative across all possible roles for simulated learners.

July, 2013
Gord McCalla & John Champaign.
Program Committee

Co-Chair: Gord McCalla, University of Saskatchewan (mecalla@cs.usask.ca)
Co-Chair: John Champaign, Massachusetts Institute of Technology (jchampai@mit.edu)

Esma Aimeur, Université de Montréal
Roger Azvedo, McGill University
Gautam Biswas, Vanderbilt University
Tak-Wai Chan, National Central University of Taiwan
Robin Cohen, University of Waterloo
Ricardo Conejo, Universidad de Málaga
Evandro Costa, Federal University of Alagoas
Michel C. Desmarais, Ecole Polytechnique de Montréal
Sylvie Girard, Arizona State University
Lewis Johnson, Alelo
Yang Hee Kim, Utah State University
James Lester, North Carolina State University
Noboru Matsuda, Carnegie Mellon University
Kurt VanLehn, Arizona State University
Beverly Park Woolf, University of Massachusetts, Amherst
# Table of Contents

Using Simulated Learners and Simulated Learning Environments within a Special Education Context  
*Carrie Demmans Epp and Alexandra Makos*

Simulated Students, Mastery Learning, and Improved Learning Curves for Real-World Cognitive Tutors  
*Stephen Fancsali, Tristan Nixon, Annalies Vuong and Steven Ritter*

Exploring through Simulation the Effects of Peer Impact on Learning  
*Stephanie Frost and Gordon McCalla*

Using HCI Task Modeling Techniques to Measure How Deeply Students Model  
*Sylvie Girard, Lishan Zhang, Yoalli Hidalgo-Pontet, Kurt Vanlehn, Winslow Burleson, Maria Elena Chavez-Echeagaray and Javier Gonzalez-Sanchez*

Validating Item Response Theory Models in Simulated Environments  
*Manuel Hernando, Eduardo Guzmán and Ricardo Conejo*

Toward a reflective SimStudent: Using experience to avoid generalization errors  
*Christopher MacLellan, Noboru Matsuda and Kenneth Koedinger*

Towards Moment of Learning Accuracy  
*Zachary Pardos and Michael Yudelson*

Impact of Prior Knowledge and Teaching Strategies on Learning by Teaching  
*Ma. Mercedes T. Rodrigo, Aaron Ong, Rex P. Bringula, Roselle S. Basa, Cecilio Dela Cruz and Noboru Matsuda*
