PREFACE:

DWAI 2013 was co-located with AI*IA 2013, the main Italian conference on Artificial Intelligence.

DWAI targeted Italian and international Ph.D. students. The subject, A.I., was purposely kept wide, in order to foster communication and networking among Ph.D. students from different sub-areas of AI.

All authors of submitted papers were involved in the review process of other submissions, thus providing a 'behind-the scenes' perspective of the workshop.

Special thanks go to:

- The invited speakers of the panel session (Pietro Torasso, Serena Villata, Guido Boella, Luigi Di Caro) for providing precious insights and perspectives on the topic of 'strategic guidelines for a Ph.D. student'.

- The co-chairs Athanasia Louloudi and Manoel França for the supervision of the review process.

- The friends in the Organization Committee (Federico Capuzzimati, Cristina Battaglino, Manuela Sanguinetti, Pierluigi Grillo) for the help and support.

- The chairs of the main conference (Matteo Baldoni, Cristina Baroglio, Guido Boella) for accepting DWAI as an official workshop within AI*IA 2013.
