Answer Set Programming 2005

I Invited Talk

What is a Logic Program?  ......................................................... 3
Vladimir Lifschitz (Univ. of Texas at Austin, USA)

II Panels

Innovative Applications of ASP  ............................................. 7
Gerhard Brewka (Univ. of Leipzig, Germany)

Building an Open Knowledge Library  ................................. 8
Chitta Baral (Arizona State University, USA)

III Theory

A Preliminary Report on Integrating of Answer Set and Constraint Solving  13
Sabrina Baselice (Univ. "Federico II", Italy), Piero Bonatti (Univ. "Federico II", Italy), Michael Gelfond (Texas Tech University, USA)

Extending Conceptual Logic Programs with Arbitrary Rules  ................. 27
Stijn Heymans (Vrije Universiteit Brussel, Belgium), Davy Van Nieuwenborgh (Vrije Universiteit Brussel, Belgium) Dirk Vermeir (Vrije Universiteit Brussel, Belgium)

Combining Answer Sets of Nonmonotonic Logic Programs  ..................... 42
Chiaki Sakama (Wakayama University, Japan), Katsumi Inoue (National Institute of Informatics, Japan)

An Algebraic Account of Modularity in ID-logic  .......................... 57
Joost Vennekens (K.U.Leuven, Belgium), Marc Denecker (K.U.Leuven, Belgium)

Nelson’s Strong Negation, Safe Beliefs and the Answer Set Semantics ........ 70
Magdalena Ortiz (Universidad de las Amélicas, México), Mauricio Osorio (Universidad de las Américas, México)

Disjunctive Answer Set Programming via Satisfiability  ....................... 85
Yuliya Lierler (Erlangen-Nürnberg Universität, Germany)
## IV Software Engineering

Reducing Propositional Theories in Equilibrium Logic to Logic Programs .... 101
Pedro Cabalar (Corunna University), David Pearce (Universidad Rey Juan Carlos), Agustín Valverde (Málaga University)

Towards Implementations for Advanced Equivalence Checking in Answer-Set Programming ................................................. 115
Hans Tompits (Technische Universität Wien, Austria), Stefan Woltran (Technische Universität Wien, Austria)

SELP - A System for Studying Strong Equivalence between Logic Programs ... 130
Yin Chen (South China Normal University, China and Sun Yat-sen University, China), Fangzhen Lin (Hong Kong University of Science and Technology) and Lei Li (Sun Yat-sen University, China)

Debugging Logic Programs under the Answer Set Semantics ................. 141
Martin Brain (University of Bath, UK), Marina De Vos (University of Bath, UK)

## V Implementation

A New Algorithm for Answer Set Computation .......................... 155
Giuliano Grossi (Università degli Studi di Milano, Italy), Massimo Marchi (Università degli Studi di Milano, Italy)

The nomore++ Approach to Answer Set Solving .......................... 163
Christian Anger (Universität Potsdam, Germany), Martin Gebser (Universität Potsdam, Germany), Thomas Linke (Universität Potsdam, Germany), André Neumann (Universität Potsdam, Germany), Torsten Schaub (Universität Potsdam, Germany)

An Experimental Study of Search Strategies and Heuristics in Answer Set Programming ................................................. 178
Enrico Giunchiglia (University of Genova, Italy), Marco Maratea (University of Genova, Italy)

An Interactive Approach to Answer Set Programming ....................... 190
Martin Brain (University of Bath, UK), Richard Watson (Texas Tech University, USA), Marina De Vos (University of Bath, UK)

Possibilistic Stable Model Computing ................................. 203
Pascal Nicolas (University of Angers, France), Claire Lefèvre (University of Angers, France)
A Backjumping Technique for Disjunctive Logic Programming ............... 216
Wolfgang Faber (University of Calabria, Italy), Nicola Leone (University of
Calabria, Italy), Francesco Ricca (University of Calabria)

VI Application

Intelligence Analysis Using Quantitative Preferences ....................... 233
Davy Van Nieuwenborgh (Vrije Universiteit Brussel, Belgium), Stijn Heymans
(Vrije Universiteit Brussel, Belgium), Dirk Vermeir (Vrije Universiteit
Brussel, Belgium)

Exploiting ASP for Semantic Information Extraction ....................... 248
Massimo Ruffolo (Exeura, Italy and ICAR-CNR, Italy), Nicola Leone (Exeura,
Italy and University of Calabria, Italy), Marco Manna (ICAR-CNR, Italy)
Domenico Saccà (ICAR-CNR, Italy and ICAR-CNR, Italy and University of
Calabria, Italy) Amedeo Zavatto (ICAR-CNR, Italy)

Abduction and Preferences in Linguistics ........................................... 263
Kathrin Konczak (Universität Potsdam, Germany), Ralf Vogel (Universität
Potsdam, Germany)

A Language for Modular Answer Set Programming: Application to ACC
Tournament Scheduling ................................................................. 277
Luis Tari (Arizona State University, USA), Chitta Baral (Arizona State
University, USA), Saadat Anwar (Arizona State University, USA)

Specification of Assessment-test Criteria through ASP Specifications ....... 293
Giovambattista Ianni (Università della Calabria, Italy), Claudio Panetta
(Università della Calabria, Italy), Francesco Ricca (Università della
Calabria, Italy)

Modeling Hybrid Domains Using Process Description Language .......... 303
Sandeep Chintabathina (Texas Tech University, USA), Michael Gelfond (Texas
Tech University, USA), Richard Watson (Texas Tech University, USA)

Applications of Preferences using Answer Set Programming ............... 318
Claudia Zepeda (Universidad de las Américas, México and Université Lyon 1
and INSA de Lyon, France), Mauricio Osorio (Universidad de las Américas,
México), Juan Carlos Nieves (Universidad de las Américas, México),
Christine Solnon (Université Lyon 1 and INSA de Lyon, France), David Sol
(Universidad de las Américas, México)

Author Index ................................................................. 333
