Workshop Notes

International Workshop

“What can FCA do for Artificial Intelligence?”

FCA4AI

International Joint Conference on Artificial Intelligence

IJCAI 2015

July 25, 2015

Buenos Aires, Argentina

Editors
Sergei O. Kuznetsov (NRU HSE Moscow)
Amedeo Napoli (LORIA Nancy)
Sebastian Rudolph (TU Dresden)

Preface

The three preceding editions of the FCA4AI Workshop showed that many researchers working in Artificial Intelligence are deeply interested by a well-founded method for classification and mining such as Formal Concept Analysis (see http://www.fca4ai.hse.ru/). The first edition of FCA4AI was co-located with ECAI 2012 in Montpellier and published as http://ceur-ws.org/Vol-939/, the second edition was co-located with IJCAI 2013 in Beijing and published as http://ceur-ws.org/Vol-1058/, and finally the third edition was co-located with ECAI 2014 in Prague and published as http://ceur-ws.org/Vol-1257/.

Based on that, we decided to continue the series and we took the chance to organize a new edition of the workshop in Buenos Aires at the IJCAI 2015 Conference. This year, the workshop has again attracted many different researchers working on actual and important topics, e.g. recommendation, linked data, classification, biclustering, pattern mining, ontology design, and various applications. This shows the diversity and the richness of the relations between FCA and AI. Moreover, this is a good sign for the future and especially for young researchers that are at the moment working in this area or who will do.

Formal Concept Analysis (FCA) is a mathematically well-founded theory aimed at data analysis and classification. FCA allows one to build a concept lattice and a system of dependencies (implications) which can be used for many AI needs, e.g. knowledge discovery, learning, knowledge representation, reasoning, ontology engineering, as well as information retrieval and text processing. As we can see, there are many “natural links” between FCA and AI.

Recent years have been witnessing increased scientific activity around FCA, in particular a strand of work emerged that is aimed at extending the possibilities of FCA w.r.t. knowledge processing, such as work on pattern structures and relational context analysis. These extensions are aimed at allowing FCA to deal with more complex than just binary data, both from the data analysis and knowledge discovery points of view and as well from the knowledge representation point of view, including, e.g., ontology engineering.

All these investigations provide new possibilities for AI activities in the framework of FCA. Accordingly, in this workshop, we are interested in two main issues:

- How can FCA support AI activities such as knowledge processing (knowledge discovery, knowledge representation and reasoning), learning (clustering, pattern and data mining), natural language processing, and information retrieval.
- How can FCA be extended in order to help AI researchers to solve new and complex problems in their domains.

The workshop is dedicated to discuss such issues. This year, the papers submitted to the workshop were carefully peer-reviewed by three members of the program committee and 10 papers with the highest scores were selected. We thank all the PC members for their reviews and all the authors for their contributions.

The Workshop Chairs
Sergei O. Kuznetsov
National Research University, Higher Schools of Economics, Moscow, Russia
Amedeo Napoli
LORIA (CNRS – Inria Nancy Grand Est – Université de Lorraine), Vandoeuvre les Nancy, France
Sebastian Rudolph
Technische Universität Dresden, Germany
Program Committee

Mathieu D’Aquin (Open University, UK)
Gabriela Arevalo (Universidad Nacional de Quilmes, Argentina)
Jaume Baixeries, UPC Barcelona, Catalunya
Karell Bertet (Université de La Rochelle, France, Germany)
Claudio Carpineto (Fondazione Ugo Bordoni, Roma, Italy)
Florent Domenach (University of Nicosia, Cyprus)
Sébastien Ferré (IRISA, Rennes, France)
Marianne Huchard (LIRMM/Université de Montpellier, France)
Dmitry I. Ignatov (NRU Higher School of Economics, Moscow, Russia)
Mehdi Kaytoue (INSA-LIRIS Lyon, France)
Florence Le Ber, Université de Strasbourg, France
Nizar Messai (Université de Tours, France)
Rokia Missaoui (Université du Québec en Outaouais, Ottawa, Canada)
Sergei A. Obiedkov (NRU Higher School of Economics, Moscow, Russia)
Jean-Marc Petit (INSA-LIRIS Lyon, France)
Uta Priss (Ostfalia University of Applied Sciences, Wolfenbüttel, Germany)
Chedy Raïssi (Inria/LORIA Nancy, France)
Artem Revenko, Technische Universität Dresden, Germany
Christian Săcărea (Babes-Bolyai University, Cluj-Napoca, Romania)
Baris Sertkaya (SAP Dresden, Germany)
Henry Soldano (Université de Paris-Nord, France)
Laszlo Szathmary, University of Debrecen, Hungary
Petko Valtchev (Université du Québec à Montréal, Montréal, Canada)
Renato Vimiero (UFPE Recife, Brazil)
Contents

1 Invited Talk  
Using Trust Networks to Improve Data Quality and Recommendations  
Hernán Astudillo  ......................................................... 7

2 Bridging DBpedia Categories and DL-Concept Definitions Using Formal Concept Analysis  
Mehwish Alam, Aleksey Buzmakov, Victor Codocedo and Amedeo Napoli  .......... 9

3 A Conceptual-KDD tool for Ontology Construction from a Database Schema  
Renzo Stanley and Hernán Astudillo  .................................. 17

4 SOFIA: How to Make FCA Polynomial?  
Aleksey Buzmakov, Sergei O. Kuznetsov and Amedeo Napoli  ....................... 27

5 Pattern Structures for News Clustering  
Tatyana Makhalova, Dmitry Ilvovskiy and Boris Galitsky  ......................... 35

6 Lazy Classification with Interval Pattern Structures: Application to Credit Scoring  
Alexey Masyutin, Yury Kashnitsky and Sergei O. Kuznetsov  ....................... 43

7 Reduction in Triadic Data Sets  
Sebastian Rudolph, Christian Săcărea and Diana Troancă  ......................... 55

8 Lazy Associative Graph Classification  
Yury Kashnitsky and Sergei O. Kuznetsov  .................................. 63

9 Machine-assisted Cyber Threat Analysis Using Conceptual Knowledge Discovery  
Martín Barrère, Gustavo Betarte, Víctor Codocedo, Marcelo Rodríguez, Hernán Astudillo, Marcelo Aliquintuy, Javier Baliosian, Carlos Raniery Paula Dos Santos, Jéferson Campos Nobre, Lisandro Zambenedetti Granville and Amedeo Napoli  .... 75

10 RAPS: A Recommender Algorithm Based on Pattern Structures  
Dmitry Ignatov and Denis Kornilov  ........................................ 87

7 Finding a Lattice of Needles in a Haystack: Forming a Query from a Set of Items of Interest  
Boris Galitsky  .............................................................. 99
