Preface

This volume collects all papers accepted for presentation at Ontobras 2015, the VII Brazilian Ontology Research Seminar (7o Seminário de Pesquisa em Ontologias no Brasil), held on September 7-10, 2015 in Sao Paulo, Brazil. In its 7th edition, we sincerely hope Ontobras to be once more a valuable and pleasant opportunity for researchers and practitioners from Information Sciences and Computer Science to exchange their interesting ideas and experience on the exciting and broad field of Ontology, and to foster collaboration opportunities among research groups.

We received 32 submissions, from which 12 were accepted as full papers and 9 as short papers. All submissions were carefully evaluated by 3-4 reviewers, who provided excellent feedback for each work. The technical program of Ontobras2015 is also proud to include 3 keynote talks from distinguished researchers: Professor Grigoris Antoniou, from the University of Huddersfield, UK; Dr. Enrico Franconi, from the Free University of Bozen-Bolzano, Italy; and Dr. Gilberto Câmara, from the National Institute for Space Research (INPE), Brazil.

We are very grateful to the authors for submitting their works, to all the program committee members for doing an excellent job, and to all the people involved in the local organization, represented by Prof. José M Parente de Oliveira, from ITA, Prof. Renata Wassermann, from USP; and Raphael Côbe, from UNESP, for providing a concrete environment for this Seminar to occur.
