Preface

The ISWC 2016 Posters and Demonstrations complement the paper tracks of the conference and offer an opportunity for presenting late-breaking research results, on-going research projects, and speculative or innovative work in progress. The informal setting of the Posters and Demonstrations encourages presenters and participants to engage in discussions about the work. Such discussions can be invaluable inputs for the future work of the presenters, while offering participants an effective way to broaden their knowledge of the emerging research trends and to network with other researchers.

In 2016, we received a total of 115 submissions to the posters and demonstrations track. Each of the submissions went through a thorough peer review process, aiming at providing the authors with constructive feedback for their submission. In the end, 55 posters and 47 demos were selected for the presentation at the ISWC posters and demonstrations session.
