Preface

This volume contains the papers presented at AI*AAL 2016, the Second Italian Workshop on Artificial Intelligence for Ambient Assisted Living (http://aiia2016.istc.cnr.it), held within the XV Conference of the Italian Association for Artificial Intelligence (AI*IA 2016), in Genoa, Italy, on November 28th, 2016.

The aim of this series of workshop is to bring together researchers interested in different aspects of Artificial Intelligence for Ambient Assisted Living.

The working group “AI and Ageing Society” has previously organized several Workshops on Technological Challenges and Scenarios for the Ageing Society in Brescia, Palermo, and Torino to discuss about technological roles and opportunities for Artificial Intelligence in the Ageing Society domain. Capitalizing from these activities, the group is trying to establish a stable forum on the topic and organized the Second Edition of the Italian Workshop on Artificial Intelligence (AI) for Ambient Assisted Living (AAL) with the goal of collecting contributions, ideas and new scientific and technological scenarios, as well as to discuss and disseminate results on Artificial Intelligence for Ambient Assisted Living.

This year each paper was reviewed by three members of the Program Committee of the Workshop, and on the basis of their recommendations, 8 documents have been selected for publication and presentation at AI*AAL.it 2016.

In addition, the workshop was enriched by the valuable participation of Amedeo Cesta Senior Research Scientist at the National Research Council of Italy, ISTC-CNR as invited speaker.

We thank all members of the AI*AAL Program Committee for their effort in the review process that was fundamental for maintaining the high scientific level of the workshop. We thank the AI*IA council, who trusted us to organize AI*AAL.it 2016, and all the researchers of the AI and AAL community who supported this event by submitting their work and actively participating in it.

# Table of Contents

**Invited Talk**  
*Intelligent environments with robots: achievements and perspectives*  
Amedeo Cesta ISTC-CNR

**Sleep Disorder Evaluation Using Ambient and Wearable Sensor Technologies**  
Andrea Caroppo, Alessandro Leone, Gabriele Rescio, Giovanni Diraco and Pietro Siciliano

**Stigmergy-based Long-Term Monitoring of Indoor Users Mobility in Ambient Assisted Living Environments: the DOREMI Project Approach**  
Filippo Palumbo, Davide La Rosa and Erina Ferro

**A Reservoir Computing Approach for Human Gesture Recognition from Kinect Data**  
Claudio Gallicchio and Alessio Micheli

**Ambient Assisted Living for an Ageing Society: a Technological Overview**  
Marco Mobilio, Daniela Micucci, Toshi Kato and Hiroko Kudo

**Age-driven Crossing Behavior and Walkability: Empirical Studies towards Simulations**  
Luca Crociani, Andrea Gorrini, Giuseppe Vizzari and Stefania Bandini

**A Computer Vision Toolset for Innovative Elder Pedestrians Aware Crowd Management Support Systems**  
Sultan Daud Khan, Giuseppe Vizzari and Stefania Bandini

**Emotion-Recognition from Speech-based Interaction in AAL Environment**  
Berardina Nadja De Carolis, Stefano Ferilli, Giuseppe Palestra and Domenico Redavid

**Personalizing Support to Older Adults who Look for a Job with the SpONSOR Platform**  
Amedeo Cesta, Gabriella Cortellessa, Riccardo De Benedictis, Francesca Fracasso, Daniel Baumann, Stefano Cuomo, Julie Doyle, Adnan Imeri, Djamel Khadraoui, and Pierre Rossel
