Preface

In February 2017, we had the pleasure to organize the 9th edition of the ZEUS Workshop in Lugano. This workshop series offers young researchers an opportunity to present and discuss early ideas and work in progress as well as to establish contacts among young researchers. For this year's edition, we selected 10 regular submissions, four position papers, and one tool demonstration by researchers from Austria, Brasil, Germany, Italy, Switzerland, The Netherlands, and the United Kingdom for presentation at the workshop. Each submission went through a thorough peer-review process and was assessed by at least three members of the program committee with regard to its relevance and scientific quality. The accepted contributions covered the areas of Process Analysis, Process Enactment and Modeling Languages, Stream Processing, the Internet of Things, Cloud Management, and Software Modeling and Analysis. In addition, the workshop hosted a mini-tutorial on support for literature studies with the JabRef reference manager.

The workshop program was further enriched by two keynotes. The first keynote was held by Daniel Lübke on the topic *Why developers don't like BPM and how research can help* discussed the perception of the BPM field by developers in industry. The second keynote titled *From Service- to UI-Oriented Computing: The Vision of an Intuitive Composition Paradigm* was given by Florian Daniel, who presented a composition paradigm that leverages the UIs of applications, instead of their APIs, and that makes composition-based development accessible to an ever wider range of developers. The best presentation award was given to Xixi Lu from Eindhoven University of Technology, for her presentation of the paper *A Conceptual Framework for Understanding Event Data Quality in Behavior Analysis*.

The workshop was generously sponsored by innoQ Deutschland GmbH and SAP Schweiz AG.

Organization

Steering Committee

Oliver Kopp	University of Stuttgart
Jörg Lenhard	Karlstad University
Christoph Hochreiner	TU Wien

Local Organizer

Cesare Pautasso	USI Lugano
-----------------	------------

Program Committee Chairs

Oliver Kopp	University of Stuttgart
Jörg Lenhard	Karlstad University
Cesare Pautasso	USI Lugano

Program Committee

Saimir Bala	Vienna University of Economics and Business
Anne Baumgrass	Synfioo – 360° Transportation Monitoring
Domenico Bianculli	University of Luxembourg
Daniele Bonetta	Oracle Labs
Richard Braun	TU Dresden
Dirk Fahland	Eindhoven University of Technology
Alessio Gambi	Saarland University
Matthias Geiger	University of Bamberg
Georg Grossmann	University of South Australia
Thomas Heinze	University of Jena
Nico Herzberg	SAP SE
Christoph Hochreiner	TU Wien
Conrad Indiono	University of Vienna
Meiko Jensen	ULD Schleswig-Holstein
Stefan Kolb	University of Bamberg
Oliver Kopp	University of Stuttgart
Agnes Koschmider	Karlsruhe Institute of Technology
Philipp Leitner	University of Zurich
Jörg Lenhard	Karlstad University
Henrik Leopold	VU University Amsterdam
Stephan Reiff-Marganiec	University of Leicester
Andreas Schoenberger	Siemens AG
Stefan Schulte	TU Wien
Jan Sürmerli	Humboldt University of Berlin
Matthias Weidlich	Humboldt University of Berlin
Matthias Wieland	University of Stuttgart

Subreviewers

Johannes Wettinger	University of Stuttgart
Peter Reimann	University of Stuttgart
Han van der Aa	VU University Amsterdam
Michael Zimmermann	University of Stuttgart
Felix Baumann	University of Stuttgart

Contents

Towards Certified Data Flow Analysis of Business Processes	1
<i>Thomas Heinze</i>	
Automatic Standard Compliance Assessment of BPMN 2.0 Process Models	4
<i>Matthias Geiger, Philipp Neugebauer and Andreas Vorndran</i>	
A Conceptual Framework for Understanding Event Data Quality for Behavior Analysis	11
<i>Xixi Lu and Dirk Fahland</i>	
Towards the Generation of Test Cases for Executable Business Processes from Classification Trees	15
<i>Thilo Schnelle and Daniel Lübke</i>	
Events in BPMN: The Racing Events Dilemma	23
<i>Sankalita Mandal</i>	
Tuning Browser-to-Browser Offloading for Heterogeneous Stream Processing Web Applications	31
<i>Masiar Babazadeh</i>	
VISP Testbed - A Toolkit for Modeling and Evaluating Resource Provisioning Algorithms for Stream Processing Applications	37
<i>Christoph Hochreiner</i>	
Closed-Loop Control of 3D Printers via WebServices	44
<i>Felix Baumann and Dieter Roller</i>	
Highly Scalable and Flexible Model for Effective Aggregation of Context-based Data in Generic IIoT Scenarios	51
<i>Simon Duque Antón, Daniel Fraunholz, Janis Zemitis, Frederic Pohl and Hans Dieter Schotten</i>	
Elastic Allocation of Docker Containers in Cloud Environments	59
<i>Matteo Nardelli</i>	
Choreographies are Key for Distributed Cloud Application Provisioning	67
<i>Oliver Kopp and Uwe Breitenbücher</i>	
Benchmark Proposal for Multi-Tenancy in the Database Layer	71
<i>Philipp Neugebauer, Christian Maier and Alexander Bumann</i>	
Modeling and Analysis of Sustainability in Product Life Cycles?	79
<i>Andreas Fritsch</i>	

An Analysis of Metaheuristic to SLA Establishment in Cloud Computing	83
<i>Leonildo Azevedo, Julio C. Estrella, Claudio F. M. Toledo and Stephan Reiff-Marganiec</i>	
PROtEUS++: A Self-managed IoT Workflow Engine with Dynamic Service Discovery	90
<i>Ronny Seiger, Steffen Huber and Peter Heisig</i>
