EMISA 2017

8th International Workshop on
Enterprise Modeling and Information Systems Architectures
(EMISA)

Essen, June 12-13, 2017
EMISA 2017 Proceedings
Preface

The strategic importance of enterprise modelling has been recognized by an increasing number of companies and public agencies. Enterprise modelling delivers the ‘blueprints’ for co-designing and aligning business and enterprise information systems such that they complement each other in an optimal way. Achieving this interplay requires a multi-perspective approach taking organizational, economic, and technical aspects into account. In a world of cloud, social and big data, additional challenges for enterprise modelling and the design of information systems architectures are introduced, e.g., in respect to the design of data-driven processes or processes enabling cross-enterprise collaboration. To deal with these challenges, a close cooperation of researchers from different disciplines such as information systems, business informatics, and computer science will be required.

EMISA 2017 is the eighth international workshop in a series that provides a key forum for researchers and practitioners in the fields of enterprise modelling and the design of information system (IS) architectures. The workshop series emphasizes a holistic view on these fields, fostering integrated approaches that address and relate business processes, business people, and information technology. It is organised by the GI Special Interest Group on Design Methods for Information Systems (GI-SIG EMISA, www.emisa.org), which provides a forum for researchers from various disciplines who develop and apply methods to support the analysis and design of information systems. EMISA 2017 took place in Essen, Germany, co-located with the 29th International Conference on Advanced Information Systems Engineering (CAiSE).

In addition to proposals for talks on published or accepted papers from international conferences or journals, EMISA 2017 called for short-paper submissions on PhD Proposals and Novel Directions. The former relate to research proposals of doctoral students, whereas the latter motivate a novel research direction, outline the research gaps to address, and carve out major challenges. EMISA 2017 received 6 such proposals from several countries (Austria, Belgium, Hungary, and Germany), which have been reviewed and selected by the EMISA programme committee.

We want to express our gratitude to many people involved, the authors for submitting their papers to EMISA 2017, the members of the programme committee for their reviewing efforts, the executive board of EMISA for their support, and the organisers of CAiSE 2017 for the local arrangements.

May 2017
Michael Fellmann
Matthias Weidlich
Organizers

Michael Fellmann  University of Rostock, Germany
Matthias Weidlich  Humboldt-Universität zu Berlin, Germany

Program Committee

Jörg Desel  Fernuniversität in Hagen
Daniel Moldt  University of Hamburg
Andreas Oberweis  Karlsruhe Institute of Technology (KIT)
Agnes Koschmider  Karlsruhe Institute of Technology (KIT)
Dirk Fahland  TU Eindhoven
Stefan Klink  Karlsruhe Institute of Technology (KIT)
Horst Kremers  CODATA-Germany
Henrik Leopold  VU Amsterdam
Heinrich C. Mayr  Alpen-Adria-Universität Klagenfurt
Markus Nüttgens  University of Hamburg
Hansjuergen Paul  Institut Arbeit und Technik
Henderik Proper  Radboud University Nijmegen
Manfred Reichert  University of Ulm
Ulrich Reimer  FHS St.Gallen
Stefan Strecker  FernUniversität in Hagen
Gottfried Vossen  University of Münster
Barbara Weber  Technical University of Denmark
Mathias Weske  Hasso Plattner Institute, University of Potsdam
Ralf Laue  FH Zwickau
Kurt Sandkuhl  University of Rostock
