Preface

The advent of the Semantic Web promises machine readable semantics and a machine-processable next Generation of the Web. The first step in this direction is the annotation of static data on the Web by machine processable information about knowledge and its structure by means of Ontologies. The next step in this direction is the annotation of dynamic applications and services invocable over the Web in order to facilitate automation of discovery, selection and composition of semantically described services and data sources on the Web by intelligent methods, which is called Semantic Web Services.

This volume contains the papers presented at the international workshop on *Applications of Logic Programming in the Semantic Web and Semantic Web Services (ALPSWS2006)* held on August 16th, 2006 in Seattle, Washington as part of the 22nd International Conference on Logic Programming (ICLP06).

Many previous workshops and conferences were dedicated to these promising areas mostly with generic topics. With the ALPSWS2006 workshop we had a slightly different goal. Rather than bringing together people from a widespread variety of research fields with different understandings of the topic we wanted to focus on the various applications areas and approaches in this area from declarative logic programming (LP).

The idea was to get a snapshot of the state of the work related to applications of LP to Semantic Web and Semantic Web Services with the following main objective major benefits:

- Bringing together people from different sub-disciplines of LP and focus on technological solutions and applications from LP to the problems of the Web.
- Promoting further research in this interesting application field.

Overall, there were 13 submissions. Each submission was reviewed by at least 3 programme committee members. The committee decided to accept 7 papers (6 full-length papers and one short paper) for presentations. 5 of the papers which could not be considered for full presentations, resubmitted extended abstracts which have been presented as posters during the workshop and are also included in this volume.

Table of Contents

LP and the Semantic Web.

Forgetting in Managing Rules and Ontologies	1
<i>Thomas Eiter, Giovambattista Ianni, Roman Schindlauer, Hans Tompits, Kewen Wang</i>	
Query Evaluation and Optimization in the Semantic Web	17
<i>Edna Ruckhaus, Maria-Esther Vidal, Eduardo Ruiz</i>	
dlvhex: A Tool for Semantic-Web Reasoning under the Answer-Set Semantics	33
<i>Thomas Eiter, Giovambattista Ianni, Roman Schindlauer, Hans Tompits</i>	
G-Hybrid Knowledge Bases	39
<i>Stijn Heymans, Livia Predoiu, Cristina Feier, Jos de Bruijn, Davy Van Nieuwenborgh</i>	

LP and Semantic Web Services.

Intelligent Agents that Reason about Web Services: a Logic Programming Approach	55
<i>Viviana Mascardi, Giovanni Casella</i>	
Efficient Web Service Discovery and Composition using Constraint Logic Programming	71
<i>Srividya Kona, Ajay Bansal, Gopal Gupta, Thomas Hite</i>	
Policy-based reasoning for smart web service interaction	87
<i>Marco Alberti, Federico Chesani, Marco Gavanelli, Evelina Lamma, Paola Mello, Marco Montali, Paolo Torroni</i>	

Extended Poster Abstracts.

Towards Automated Web Service Composition with the Abductive Event Calculus	103
<i>Onur Aydin, Nihan Kesim Cicekli, Ilyas Cicekli</i>	
Modeling, verifying and reasoning about web services	105
<i>Alberto Martelli</i>	
A RuleML Syntax for Answer-Set Programming	107
<i>Thomas Eiter, Giovambattista Ianni, Roman Schindlauer, Hans Tompits</i>	
Resolution-Based Execution of Description Logics Programs for Instance-Retrieval	109
<i>Gergely Lukácsy, Zsolt Nagy, Peter Szeredi</i>	
Applying Prolog to Semantic Web Ontologies and Rules: Moving Toward Description Logic Programs	112
<i>Ken Samuel, Leo Obrst, Suzette Stoutenberg, Karen Fox, Paul Franklin, Adrian Johnson, Ken Laskey, Deborah Nichols, Steve Lopez, Jason Peterson</i>
