RCRA 2017

Preface

This volume contains the papers presented at RCRA 2017, the 24th RCRA International Workshop on Experimental Evaluation of Algorithms for Solving Problems with Combinatorial Explosion (http://rcra.aixia.it/rcra2017), held within the XVI Conference of the Italian Association for Artificial Intelligence (AI*IA 2017), in Bari, Italy, on November 14-15, 2017.

Since the 2007 edition, the RCRA workshops have focused on the theme of algorithms in artificial intelligence, proposing benchmarks to compare them and study their efficiency through experimental evaluation. Since then, the workshop was organized in Udine (Italy), Reggio Emilia (Italy), Bologna (Italy), Barcelona (Spain), Rome (Italy), Vienna (Austria), Pisa (Italy), Ferrara (Italy) and Genova (Italy).

There were 12 submissions. Each submission was reviewed by at least three program committee members. The committee decided to accept all 12 papers for presentation at RCRA 2017. Among them 5 are original papers and are included in this volume.

We would like to thank Program Committee members and the external reviewers of RCRA 2017 for their work, as well as to the authors who submitted their articles to the conference.

We also would like to thank the Department of Computer Science, at the University of Bari and the organizers of AI*IA 2017, for hosting RCRA 2017.

Finally we acknowledge the EasyChair team and CEUR-WS.org that helped us in organizing the conference and producing the proceedings.

November 2017
Bari

Marco Maratea, Ivan Serina
Workshop Organizers
Programme Chairs

Maratea, Marco  University of Genova
Serina, Ivan  University of Brescia

Programme Committee

Alviano, Mario  University of Calabria
Bistarelli, Stefano  Università di Perugia
Cabalar, Pedro  University of Corunna
Ceberio, Martine  University of Texas at El Paso
Chesani, Federico  University of Bologna
Costantini, Stefania  University of L’Aquila
Di Gaspero, Luca  University of Udine
Dodaro, Carmine  University of Genova
Faber, Wolfgang  University of Huddersfield
Fandinno, Jorge  Coruña University
Formisano, Andrea  University of Perugia
Gadducci, Fabio  University of Pisa
Gavanelli, Marco  University of Ferrara
Järvisalo, Matti  University of Helsinki
Kiziltan, Zeynep  University of Bologna
Mancini, Toni  Sapienza University
Marques-Silva, Joao  University of Lisbon
Oddi, Angelo  ISTC-CNR
Pozzato, Gian Luca  University of Torino
Pulina, Luca  University of Sassari
Ricca, Francesco  University of Calabria
Santini, Francesco  University of Perugia
Schaub, Torsten  University of Potsdam
Schulz, Claudia  TU Darmstadt
Schüller, Peter  Marmara University
Stützle, Thomas  Université Libre de Bruxelles
Torroni, Paolo  University of Bologna
Truszczynski, Mirek  University of Kentucky
Vallati, Mauro  University of Huddersfield
Wallace, Richard  University College Cork
Wallner, Johannes P.  University of Helsinki
Woltra, Stefan  TU Wien
Zhou, Neng-Fa  CUNY Brooklyn College and Graduate Center
Contents

Regular Papers

The ingredients of the argumentation reasoner pyglaf: python, circumscription, and glucose to taste
Mario Alviano 1

Expansion-based QBF Solving on Tree Decompositions
Günther Charwat, Stefan Woltran 16

I-DLV+MS: preliminary report on an automatic ASP solver selector
Davide Fuscà, Francesco Calimeri, Jessica Zangari, Simona Perri 31

On the Quest for an Acyclic Graph
Mikolas Janota, Radu Grigore, Vasco Manquinho 41

On Minimal Corrections in ASP
Mikolas Janota and Joao Marques-Silva 56

Papers not included here and published elsewhere

Answer Set Enumeration via Assumption Literals information on submission
Mario Alviano, Carmine Dodaro.

Algebraic Particle Swarm Optimization for the Permutations Search Space information on submission
Marco Baioletti, Alfredo Milani, Valentino Santucci.

A Crisp and Soft Library for Abstract Argumentation
Stefano Bistarelli, Fabio Rossi, Francesco Santini.
Appeared in the Proceedings of the 29th IEEE International Conference on Tools with Artificial Intelligence, ICTAI. IEEE Computer Society, 2017

Constraints, Lazy Constraints, or Propagators in ASP Solving: An Empirical
CONTENTS

Analysis
Bernardo Cuteri, Carmine Dodaro, Francesco Ricca, Peter Schüller.

Planning with Always Preferences by Compilation into STRIPS with Action Costs
Luca Ceriani, Alfonso Emilio Gerevini.

Multi-Objective Optimization in a Job Shop with Energy Costs through Hybrid Evolutionary Techniques
Miguel Ángel González Fernández, Angelo Oddi, Riccardo Rasconi .

Compressed Path Databases with Ordered Wildcard Substitutions information on submission
Matteo Salvetti, Adi Botea, Alessandro Saetti, Alfonso Emilio Gerevini.
