Preface

We are pleased to present the Workshop Proceedings of the Twenty-fifth International Conference on Case-based Reasoning (ICCBR-17), held on June 26th - 29th in Trondheim, Norway.

This years brings three workshops: the Computational Analogy Workshop (CAW), the Case-based Reasoning and Deep Learning Workshop (CBRDL), and the workshop on Process-oriented Case-based Reasoning (PO-CBR). This years also features the proud tradition of the Doctoral Consortium and the Computer Cooking Contest.

We would like to thank all who contributed to the success of this workshop program, especially the authors and presenters who provided the research insights comprising the essential substance of the workshops. We would also like to thank all of the program committee members for their contributions leading to high-quality submissions, and especially the workshop organisers for their hard work over the past year developing a compelling collection of workshop programs.

Our special thanks go to the program chairs, David W. Aha and Jean Lieber; the local chair, Odd Erik Gundersen; and the publicity chair, Kerstin Bach, for their continuous support, efforts in planning the event, and assistance with producing the proceedings.

We hope that authors and other participants enjoy and are invigorated by this year’s workshop program and also find valuable resources in these proceedings for furthering their research. We look forward to a fruitful exchange of ideas in Trondheim.
