Proceedings of

9th International Workshop on Software Ecosystems (IWSECO 2017)

Held in Espoo, Finland, November 29, 2017
Contents
Committees ......................................................................................................................... iv
Preface ................................................................................................................................. v

Introduction to the Keynote on Software Ecosystem Governance
Slinger Jansen ......................................................................................................................... 1

Prospects of CPQ: Evolving toward Industry Platforms
Krista Sorri, Miika Kumpulainen, Marko Seppänen, Michael Dunne and Kai Huittinen ................................................................. 3

Platforms and Ecosystems for Connected Car Services
Micha Bosler, Christopher Jud and Georg Herzwurm ...................................................... 16

Understanding Strategic Moves and Reciprocity on Software Ecosystems: A Strategic Modeling Approach
Vik Pant and Eric Yu ................................................................................................................ 28

Ecosystem Ethics: An Ethical Analysis of Orchestrators’ Ultimate Power and the Dilemma of Ecosystem Ruling
Jani Koskinen, Minna M. Rantanen, Kai Kimppa and Sami Hyrynsalmi .............................................. 43

Software Start-up Failure: An Exploratory Study on the Impact of Investment
Arho Suominen, Sami Hyrynsalmi, Marko Seppänen, Kaisa Still and Leena Aarikka-Stenroos .............................................................. 55

Leveraging Ecosystems for Growth: An Industry Perspective on Consuming Software Ecosystems
Henri Terho ............................................................................................................................ 65

Platform-Driven Ecosystem Prefacing for Emerging Markets in Developing Countries
Johannes Holvitie, Timo Vasankari, Antero Järvi, Salla Eilola, Sami Hyrynsalmi, Niina Käyhkö and Harun Makandi ........................................ 74

Measuring Tool and Resource Maturity in Developer Ecosystems
Koen van Baarsen, Slinger Jansen and Sergio España ......................................................... 88
In Search for the Core of the Business Ecosystem Concept: A Conceptual Comparison of Business Ecosystem, Industry, Cluster, and Inter Organizational Network
Matti Mäntymäki and Hannu Salmela ................................................................. 103

SECOs as a Mean to Survive? – Case Municipal ICT
Ari Helin .................................................................................................................. 114

Entering an Ecosystem: The Hybrid OSS Landscape from a Developer Perspective
Hanna Mäenpää, Fabian Fagerholm, Myriam Munezero, Terhi Kilamo and Tommi Mikkonen ................................................................. 127
Organizing Committee

Jan Bosch — Chalmers University of Technology, Sweden
Sami Hyrynsalmi — Tampere University of Technology, Finland
Christopher Jud — University of Stuttgart, Germany
Arho Suominen — VTT Technical Research Centre of Finland

Program Committee

Ari Helin — University of Turku, Finland
Sami Hyrynsalmi — Tampere University of Technology, Finland
Slinger Jansen — Utrecht University, the Netherlands
Christopher Jud — University of Stuttgart, Germany
Miika Kumpulainen — Tampere University of Technology, Finland
Konstantinos Manikas — DHI Group & IT University of Copenhagen, Denmark
Matti Mäntymäki — University of Turku, Finland
Rodrigo dos Santos — Universidade Federal do Estado do Rio de Janeiro, Brazil
Krista Sorri — Tampere University of Technology, Finland
Kaisa Still — VTT Technical Research Centre of Finland
Arho Suominen — VTT Technical Research Centre of Finland
George Valença — Universidade Federal Rural de Pernambuco, Brazil
Krzysztof Wnuk — Blekinge Institute of Technology, Sweden
Preface

The 9th International Workshop on Software Ecosystems (IWSECO 2017) was held in Espoo, Finland at November 29th, 2017. The workshop gathered together nearly 30 attendees from both academia and industry. The workshop was supported by VTT Technical Research Centre of Finland, Tampere University of Technology, and Tekes — the Finnish Funding Agency for Technology and Innovation. IWSECO 2017 was organised day before Slush 2017, the world’s leading startup event, and many of ecosystem researchers and practitioners took part also in this event.

This year’s workshop consisted of 11 workshop papers and a seminal keynote. All papers submitted to the workshop were reviewed by at least three members of program committee and the papers were selected according to suggestions. As a result, the workshop took again multiple vantage points to software ecosystems. The concept of ecosystem and the evolution of software ecosystems was of course front and center of the workshop. In his keynote Slinger Jansen narrated the road thus far [1] highlighting the impetus for software ecosystems research. Beyond the keynote, the workshop discussion ventured into looking at strategic decision making [4–6], theoretical framing [9, 10, 12], cases studies [2, 3, 11], industry perspective [7] and to emerging markets [8].

January 2018

Sami Hyrynsalmi, Arho Suominen, Christopher Jud & Jan Bosch
