Preface

This workshop was conducted in conjunction with the 19th Artificial Intelligence in Education Conference (AIED) which was part of the London Festival of Learning in June 2018. This workshop focused on different applications of team tutoring within intelligent tutoring systems (ITSs). The workshop included many examples of team tutoring in action in different domains, as well as considerations for creating team tutors. The goals of this workshop included identifying use cases and approaches in team tutoring. Additionally, there was a focus on challenges encountered in team tutoring and how they were overcome by the attendees. The workshop ended on a discussion which identified commonalities in the work and approaches of the attendees, as well as steps forward for team tutoring. These challenges and solutions in team tutoring are captured within the proceedings papers in this volume.

June 2018
Anne M. Sinatra and Jeanine A. DeFalco
### Table of Contents

- **Introduction to Assessment and Intervention during Team Tutoring**
  Anne M. Sinatra, Jeanine A. DeFalco & Robert Sottilare
  1

- **Analysing Groups’ Problem-solving Process to Characterize Collaboration within Groups**
  Adeniran Adetunji, Judith Masthoff, & Nigel Beacham
  5

- **Impact of Rejection Sensitivity on Socio-cognitive Conflict Learning in Intelligent Tutoring System Environments**
  Zhou Long, Hongli Gao, Nia Dowell, Lei Yang & Xiangen Hu
  17

- **Considerations for Dealing with Real-Time Communications in an Intelligent Team Tutoring System Experiment**
  Anne M. Sinatra, Stephen Gilbert, Michael Dorneich, Eliot Winer, Alec Ostrander, Kaitlyn Ouverson, Joan Johnston & Robert Sottilare
  28

- **Simulating Collaborative Learning through Decision-Theoretic Agents**
  David V. Pynadath, Ning Wang & Richard Wang
  36

- **Framework for Effective Teamwork Assessment in Collaborative Learning and Problem Solving**
  Pravin Chopade, Saad Khan, Kristin Stoeffler, David Edwards, Yigal Rosen & Alina von Davier
  48

- **Indeterminacy and Context Challenges in Automated Team Assessment and Tutoring**
  Wayne W. Zachary
  59
