

## CONTENTS

### Data Science

1. Fuzzy model for support investment decisions under risk  
E V Orlova.....1-9
2. Minimisation of robust estimates of the sums of parametrised functions  
Z M Shibzukhov, M A Kazakov and D P Dimitrichenko.....10-16
3. Algorithm for detecting the latent mastitis state of animals in a dairy farms on the based  
of data fusion from different types sensors  
L V Antonov, A A Orlov and A V Astafiev.....17-23
4. Optimization of conditions of a heterogeneous catalytic reaction  
S N Koledin, K F Koledina, I M Gubaydullin and A F Mullayanova.....24-30
5. Myocardial infarction detection using wavelet analysis of ECG signal  
N S Davydov and A G Khramov.....31-37
6. Development of data model for the functioning of production active elements based on information  
interaction  
I N Khaimovich and V MRamzaev.....38-45
7. Data Modelling to Analyze How the Cities in the Volga Region Correspondent  
to the Digital State Format  
I N Khaimovich, V M Ramzaev and V G Chumak.....46-55
8. Block algorithm for the joint difference solution of the d'Alembert and Maxwell's equations  
L V Yablokova and D L Golovashkin.....56-62
9. An approach to analysis of the similarity of DNA-Sequences  
B F Melnikov, E A Melnikova, S V Pivneva and M A Trenina.....63-72
10. The ensemble of algorithms for coronary heart disease detection based on electrocardiogram  
V N Guryanova.....73-83
11. On an approach to assessing the inter-channel phase synchronization of electroencephalogram signals  
Y V Obukhov, R A Tolmacheva, A F Polupanov and L A Zhavoronkova.....84-88
12. Machine Learning in a Multi-Agent System for Distributed Computing Management  
I V Bychkov, A G Feoktistov, I A Sidorov, A V Edelev, S A Gorsky and R O Kostromin.....89-97
13. The development of a virtual laboratory based on Unreal Engine 4  
D A Sheverev and I N Kozlova.....98-104
14. Simulation modelling of the transmission system of the telemetric information on the status  
of the on-board aircraft status  
M B Guzairov, A I Frid, A M Vulfin and V V Berkholts.....105-111
15. Cloud technologies in the problems of mathematical analysis of cardiological information  
E Zimina, M Novopashin and A Shmid.....112-118
16. Application of time series analysis for structural and parametric identification of fuzzy  
cognitive models  
R A Isaev and A G Podvesovskii.....119-125
17. The application of Kohonen Self-Organizing Maps for the classification of the electronic  
components and reliability improvement of onboard equipment  
R O Mishanov.....126-131

18. Development of Traffic Signs Recognition Webservice based on Convolutional Neural Networks K A Pronchuk and P Y Yakimov.....	132-138
19. Information-analytical system of chemical technology processes modeling by the use of parallel calculations I V Akhmetov and I M Gubaydullin.....	139-145
20. Implementation of the finite-difference method for solving Maxwell's equations in MATLAB language on a GPU N D Morunov.....	146-151
21. Numerical simulation of the ion focusing process in a dust impact time of flight mass spectrometer I V Piyakov, D V Rodin, M A Rodina and A M Telegin.....	152-157
22. Simulation of the control system of the electrodynamic accelerator of dust particles A V Piyakov, D V Rodin, M A Rodina, A M Telegin and S N Kondratev.....	158-164
23. A research of classification algorithm of spatial information on the basis of methods of persistent homology and random forest S V Eremeev, K V Kuptsov and Yu A Kovalev.....	165-171
24. Analysis of the personal information from social networks to solve the problems of criminology E A Gambarova, V A Bakaev, N V Olinder, A V Blagov and M E Naumov.....	172-178
25. The approach to the construction of question-answer systems based on the syntagmatic analysis of the text A A Zarubin, A R Koval, A A Filippov and V S Moshkin.....	179-185
26. Machine learning in the problem of recognition of pitting corrosion on aluminum surfaces M Enikeev, L Enikeeva, M Maleeva and I Gubaydullin.....	186-192
27. Development and implementation of social network data collection services to improve the human environment I A Rytsarev, A V Blagov and M I Khotilin.....	193-198
28. Reconstruction of the phonetic composition the recognized word using lexical ontology V S Moshkin, A I Armer and N A Krashenninnikova.....	199-205
29. Methods of RFID data processing in intelligent systems for the identification and movement control of industrial products A V Astafiev, A A Orlov, D P Popov and M V Pshenichkin.....	206-213
30. Development of an algorithm for forecasting and preventing emergency situations in industrial traffic control systems based on data analysis of multi-code labels A V Astafiev, A A Orlov and T O Shardin.....	214-221
31. Method monitoring of movement in the task of indoor navigation M P Osipov and V S Andreev.....	222-227
32. Distributed Infrastructure for Big Data Processing in the Transaction Monitoring Systems M U Sapozhnikova, M M Gayanova, A M Vulfin, A V Nikonov and A V Chuykov.....	228-235
33. Neuro-Fuzzy Model for Arrhythmia Diagnostic System A V Nikonov, A M Vulfin, M M Gayanova and M U Sapozhnikova.....	236-247

34. Integration Issues of Big Data Analysis on Social Networks A V Ivaschenko, N Yu Ilyasova, A A Khorina, V A Isayko, D N Krupin, V A Bolotsky and P V Sitnikov.....	248-254
35. Storage subsystem for intelligent oil wells control system K F Tagirova, A R Ramazanov, A M Vulfin and A V Nikonov.....	255-261
36. Application of the principal component analysis to detect semantic differences during the content analysis of social networks I A Rytsarev, D D Kozlov, N S Kravtsova, A V Kupriyanov, K S Liseckiy, S K Liseckiy, R A Paringer and N Yu Samykina.....	262-269
37. The problem of fuzzy duplicate detection of large texts E V Sharapova and R V Sharapov.....	270-277
38. Applying process mining techniques and neural networks to creating and assessment of business process models K Grigороva, K Mironov and E Y Malysheva.....	278-286
39. The ontology-driven approach to support the requirements engineering process in Scrum framework M Sh Murtazina and T V Avdeenko.....	287-295
40. The research of fuzzy decision trees building based on entropy and the theory of fuzzy sets S B Begenova and T V Avdeenko.....	296-303
41. Dual ordered structures of binary relations V P Tsvetov.....	304-311
42. Geometric and game approaches for some discrete optimization problems B F Melnikov, E A Melnikova, S V Pivneva, V A Dudnikov and E V Davydova.....	312-321
43. The using of fractal measures for network state monitoring and probabilistic network attack type determination O Yu Gubareva, O V Osipov, A O Pocheptsov and V V Pugin.....	322-327
44. Development of a knowledge base based on context analysis of external information resources N Yarushkina, A Filippov and V Moshkin.....	328-337
45. Linear codes invariant with respect to generalized shift operators V G Labunets and E Ostheimer.....	338-348
46. Combined use of correlation measures for selecting semantically close concepts of the ontology A Yu Timofeeva, T V Avdeenko, E S Makarova and M Sh Murtazina.....	349-358
47. Algorithms of automation of 3D modeling of urban environment objects using attributive information from a digital map M P Osipov and O A Chekodaev.....	359-365
48. On improving the quality of VoIP connections A A Bukatov, D Y Polukarov, N D Zaitsev and A M Sukhov.....	366-371
49. Is there an optimum in ad-hoc networks? D Y Polukarov and P O Chursin.....	372-376
50. Improvement of resource efficiency of the catalytic isomerization process by mathematical modeling A G Faskhutdinov, I V Akhmetov, A E Musina and I M Gubaydullin.....	377-383

51. Methods of signal processing and construction of diagnostic matrixes onset by sleep apnea treatment equipment N V Ivakhno, S I Zykin and S V Antsibor.....	384-391
52. Using component-wise functions in cryptographical transformation algorithm from Russian National Standard GOST R 34.12-2015 I I Vasilishin and S Y Korabelshchikova.....	392-398
53. Automated sound generation based on image colour spectrum with using the recurrent neural network N A Nikitin, V L Rozaliev, Yu A Orlova and A V Alekseev.....	399-408
54. Analysis of dependence of the 2FSI subsystem parameters on the labyrinth seal diameter of the centrifugal compressor in the gas pumping unit L N Butymova and V Y Modorskii.....	409-414
55. The Creation of Scalable Tools for Solving Big Data Analysis Problems Based on the MongoDB Database O I Vasilchuk, A A Nechitaylo, D L Savenkov and K S Vasilchuk.....	415-423
56. Method of application of the genetic algorithm for automatic generation of test data K E Serdyukov and T V Avdeenko.....	424-430
57. Analysis of the influence of citizens' altruism on the effectiveness of the socially-optimal actions stimulation system M I Geraskin.....	431-439
58. Personal data segmentation based on conjugation index usage P V Hripunov and D A Zherdev.....	440-442
59. A fractal statistical fraud detection analysis in databases P V Hripunov.....	443-445
