

Preface

This book constitutes the CEUR proceedings of the (a) 18th CIAO! Doctoral Consortium (18th CIAO! DC), (b) Enterprise Engineering Working Conference Forum 2018 (EEWC Forum 2018) and (c) Enterprise Engineering Working Conference Posters 2018 (EEWC Posters 2018), held in conjunction with the 8th Enterprise Engineering Working Conference (EEWC2018), in Luxembourg, Luxembourg, between May 28th and June 1st, 2018. The Enterprise Engineering Working Conference addresses the emerging field of Enterprise Engineering, having as goal to gather academics and practitioners in order to share innovative research issues and practical experiences, mixing rigour and relevance, and to facilitate profound discussions on the domain of Enterprise Ontology, Normalized Systems, Foundational Ontologies, Enterprise Interoperability, Standards and Policies in various sectors/domains, and other Enterprise Engineering topics.

One of the ways to involve researchers and practitioners is to organize parallel events to the main conference. These parallel events provide an additional opportunity to promote discussion in EE field regarding new emerging themes that are being researched. In addition, it integrates EE community with industrial initiatives, increasing the academic / industry collaboration.

This volume contains 2 papers from EEWC Forum 2018, 2 posters from EEWC 2018 and 3 papers from 18th CIAO! DC.

Finally, we thank all the participants, the authors and the reviewers for their contributions to these EEWC collocated events and hope that you find this proceeding useful to further explore the Enterprise Engineering challenges.
