

# Message from the Workshop Chair

André van Hoorn

*University of Stuttgart, Institute of Software Technology  
Stuttgart, Germany*

The Multi-Conference on Software Engineering (SE) and Software Management (SWM) is organized annually by the Gesellschaft für Informatik (GI). SE/SWM 2019 was held from February 18 to 22, 2019 in Stuttgart, Germany. In addition to the main technical and scientific programme, workshops are always an integral part of the conference programme. At SE/SWM 2019 the following four full-day workshops were held:

- EMLS 2019: 6th Collaborative Workshop on Evolution and Maintenance of Long-Living Systems
- ASE 2019: 16th Workshop on Automotive Software Engineering
- AvioSE 2019: 1st Workshop on Avionics Systems and Software Engineering
- ISEE 2019: 2nd Workshop on Innovative Software Engineering Education

The workshops were selected by a committee based on criteria such as the feasibility of the proposed workshop topic and setting, the potential to attract both authors of papers and an engaged audience, as well as the strategies to reach this potential target audience.

This joint workshops proceedings volume provides for each workshop a summary by the respective organizers as well as the accepted papers.

## ACKNOWLEDGMENT

Putting together the workshop programme and the corresponding proceedings volume was a joint effort, and I would like to use this opportunity to acknowledge the support of several people.

For their efforts in organizing the workshops, I would like to thank Robert Heinrich (Karlsruher Institut für Technologie), Reiner Jung (Universität Kiel), Marco Konersmann (Universität Duisburg-Essen), and Eric Schmieders (Landesamt für Zentrale Polizeiliche Dienste NRW) for EMLS 2019, Steffen Helke (BTU Cottbus-Senftenberg), Ina Schaefer (Technische Universität Braunschweig), and Andreas Vogelsang (Technische Universität Berlin) for ASE 2019, Björn Annighöfer (Universität Stuttgart), Andreas Schweiger, and Marina Reich (both Airbus Defence and Space GmbH, Manching) for AvioSE 2019, as well as Stephan Krusche (Technische Universität München), Kurt Schneider (Leibniz-Universität Hannover), and Marco Kuhrmann (Technische Universität Clausthal) for ISEE 2019. Of course, many thanks also to everybody who contributed to the workshops by submitting and presenting their works, as well as to the various reviewers of the workshops for evaluating the submissions.

I would like to thank Stephan Krusche (Technische Universität München), Jan-Philipp Steghöfer (Chalmers | University of Gothenburg), and Stefan Sauer (Universität Paderborn, s-lab) for serving in the workshop selection committee and supporting me in evaluating the submitted proposals by very detailed and constructive reviews.

Finally, I would like to thank Stephan Krusche (Technische Universität München) who did a great job as proceedings chair, managing the whole process of putting together this joint proceedings volume.
