

Table of Contents

Tutorial	1
Foundations of Interactive Adaptive Learning	
<i>Georg Krempel</i>	1
From Interactive Machine Learning to Explainable Artificial Intelligence	
<i>Andreas Holzinger</i>	2
Invited Talk	3
Evaluation of Interactive Machine Learning Systems	
<i>Nadia Boukhelifa</i>	3
Full Research Papers	4
Toward Faithful Explanatory Active Learning with Self-explainable Neural Nets	
<i>Stefano Teso</i>	4
Validating One-Class Active Learning with User Studies – a Prototype and Open Challenges	
<i>Holger Trittenbach, Adrian Englhardt and Klemens Böhm</i>	17
RAL – Improving Stream-Based Active Learning by Reinforcement Learning	
<i>Sarah Wassermann, Thibaut Cuvelier and Pedro Casas</i>	32
Knowledge-based Selection of Gaussian Process Surrogates	
<i>Zbyněk Pitra, Lukáš Bajer and Martin Holeňa</i>	48
Explicit Control of Feature Relevance and Selection Stability Through Pareto Optimality	
<i>Victor Hamer and Pierre Dupont</i>	64
Deep Bayesian Semi-Supervised Active Learning for Sequence Labelling	
<i>Tomáš Šabata, Juraĵ Eduard Páll and Martin Holeňa</i>	80
Short Papers	96
Combating Stagnation in Reinforcement Learning Through ‘Guided Learning’ with ‘Taught-Response Memory’	
<i>Keith Tunstead and Joeran Beel</i>	96
Towards Active Simulation Data Mining	
<i>Mirko Bunse, Amal Saadallah and Katharina Morik</i>	104
Active Feature Acquisition for Opinion Stream Classification under Drift	
<i>Ranjith Shivakumaraswamy, Christian Beyer, Vishnu Unnikrishnan, Eirini Ntoutsi and Myra Spiliopoulou</i>	108
