

Preface

This volume contains the papers presented at the Cyber-Physical Systems (CPS) Ph.D. Workshop 2019 (CPSWS19, <http://www.cpsschool.eu/cps-workshop>), an event held within the CPS Summer School “Designing Cyber-Physical Systems – From concepts to implementation” in Alghero, Italy, on September 23, 2019.

There were 11 submissions. Each submission was reviewed by at least three Program Committee members. The committee decided to accept for presentation at CPSWS19 all the papers submitted.

We would like to thank Program Committee members of the workshop for their work, as well as the authors who submitted their articles. Finally, we acknowledge the EasyChair team and CEUR-WS.org that helped us in organizing the workshop and producing the proceedings.

Alghero, September 2019
