

Artificial Intelligence in Education 2019

Chicago, IL, USA

June 29, 2019

Workshop Proceedings:

Approaches and Challenges in Team Tutoring

Workshop Co-Chairs:

Anne M. Sinatra, Ph.D.

*U.S. Army Combat Capabilities Development Command (CCDC) – Soldier Center –
Simulation & Training Technology Center (STTC)*

Jeanine A. DeFalco, Ph.D.

Oak Ridge Associated Universities & U.S. Army CCDC Soldier Center STTC

Workshop Program Committee:

Benjamin Goldberg, Ph.D.

U.S. Army CCDC Soldier Center STTC

Art Graesser, Ph.D.

University of Memphis

Xianguan Hu, Ph.D.

University of Memphis

Rodney Long

U.S. Army CCDC Soldier Center STTC

Preface

The *Approaches and Challenges in Team Tutoring Workshop* was conducted in conjunction with the 20th Artificial Intelligence in Education Conference (AIED) in Chicago, IL, in June 2019. This workshop focused on different approaches and challenges of team tutoring within intelligent tutoring systems (ITSs). The workshop included many examples of team tutoring in action in different domains, as well as lessons learned from the development of the team tutors. The goals of this workshop included identifying challenges and approaches in team tutoring. One representative element of challenges in team tutoring included how they were overcome by our presenters, findings that can assist other researchers in the future. The workshop concluded with a discussion of the current gaps in the team tutoring domain, commonalities in the challenges that were identified, as well as steps forward for team tutoring. The challenges and approaches identified are captured in the papers included in this proceedings.

June 2019

Anne M. Sinatra and Jeanine A. DeFalco

Table of Contents

Introduction to Approaches and Challenges in Team Tutoring	1-4
<i>Anne M. Sinatra, & Jeanine A. DeFalco</i>	
Team Data Analysis Using FATE: Framework for Automated Team Evaluation	5-14
<i>Alec Ostrander, Stephen Gilbert & Michael Dorneich</i>	
Sensing Team Interaction to Enhance Learning and Performance during Adaptive Instruction	15-29
<i>Robert Sottolare & Ross Hoehn</i>	
Toward Computational Models of Team Effectiveness with Natural Language Processing	30-39
<i>Randall Spain, Michael Geden, Wookhee Min, Bradford Mott, and James Lester</i>	
Intelligent After-Action Review Support Tools for Large Team Training	40-49
<i>Sowmya Ramachandran & Randy Jensen</i>	
Team Tutoring Automated Content Discovery and Learning Objective Alignment	50-58
<i>Benjamin Bell, Keith Brawner, Elaine Kelsey, & Debbie Brown</i>	
Towards Dynamic Intelligent Support for Collaborative Problem Solving	59-65
<i>Sidney D'Mello, Angela E.B. Stewart, Mary Jean Amon, Chen Sun, Nicholas Duran, & Valerie Shute</i>	
An Appraisal of a Collaboration-Metric Model based on Text Discourse	66-76
<i>Adetunji Adeniran, Judith Mastho, & Nigel Beacham</i>	
The Effects of Rejection Sensitivity on Confusion Regulation during Learning in Multiagent Intelligent Tutoring System Environments	77-86
<i>Zhou Long, Dehong Luo, Hongli Gao, & Xiangen Hu</i>	
Simulating Team Tutoring in Multiagent Environments	87-96
<i>Max Johnson, Ning Wang, & David V. Pynadath</i>
