

Preface

International Scientific Symposium «Intelligent Solutions» (IntSol-2021) provides a leading international forum that brings together researchers and practitioners from different fields with the purpose of exploring the fundamental aspects of computational intelligence and decision making theory as practical impacts of information technology in modern world. The collection includes selected papers presented at the 2th International Scientific Symposium «Intelligent Solutions» (IntSol-2021, September 28-30, 2021, Kyiv-Uzhhorod, Ukraine).

The purpose of the event is presentation and discussion of the latest scientific results in the field of computer science, information technology, research and development of methodologies, techniques and tools for digital transformations of society on this basis. The conference was held as a video conference using the Zoom platform on 28-30 September.

The collection contains main conference papers peer-reviewed and selected by the program committee. Professors and associate professors, sometimes in collaboration with PhD students are the authors of the papers.
