VOILA! 2021

Proceedings of the 6th International Workshop on

Visualization and Interaction for
Ontologies and Linked Data

Co-located with ISWC 2021, Virtual, October 25, 2021.
Organizing Committee

Patrick Lambrix, Linköping University and University of Gävle, Sweden
Catia Pesquita, LASIGE, Faculdade de Ciências, Universidade de Lisboa, Portugal
Vitalis Wiens, L3S, TIB, & Leibniz University Hanover, Germany

Program Committee

Kārlis Čerņīns, University of Latvia, Latvia
Aba-Sah Dadzie, Edinburgh University, UK
Anastasia Dimou, KU Leuven, Belgium
Roberto García, Universitat de Lleida, Spain
Alain Giboin, Université Côte d’Azur, Inria, CNRS, I3S, France
Anika Groß, Anhalt University of Applied Sciences, Germany
Ali Hasnain, Royal College of Surgeons Ireland,
University of Medicine and Health Sciences, Ireland
Emmanuel Pietriga, INRIA Saclay, France
Harald Sack, FIZ Karlsruhe, Leibniz Institute for Information Infrastructure & KIT Karlsruhe, Germany
Daniel Schwabe, Pontifical Catholic University of Rio de Janeiro, Brazil
Kamran Sedig, University of Western Ontario, Canada
Ahmet Soylu, Norwegian University of Science and Technology, Norway
Markel Vigo, University of Manchester, UK
Preface

The Semantic Web enables intelligent agents to create knowledge by interpreting, integrating and drawing inferences from the abundance of data at their disposal. It encompasses approaches and techniques for expressing and processing data in machine-readable formats. All these tasks demand a human-in-the-loop; without them, the great vision of the Semantic Web would hardly be achieved. Meanwhile, visual interfaces for modeling, editing, exploring, integrating, etc., of semantic content have not received much attention yet.

The size and complexity of ontologies and Linked Data in the Semantic Web constantly grows and the diverse backgrounds of the users and application areas multiply at the same time. Providing users with visual representations and intuitive interaction techniques can significantly aid the exploration and understanding of the domains and knowledge represented by ontologies and Linked Data.

Ontology visualization is not a new topic and a number of approaches have become available in recent years, with some being already well-established, particularly in the field of ontology modeling. In other areas of ontology engineering, such as ontology alignment and debugging, although several tools have recently been developed, few provide a graphical user interface, not to mention navigational aids or comprehensive visualization and interaction techniques.

In the presence of a huge network of interconnected resources, one of the challenges faced by the Linked Data community is the visualization of multidimensional datasets to provide for efficient overview, exploration and querying tasks, to mention just a few. With the focus shifting from a Web of Documents to a Web of Data, changes in the interaction paradigms are in demand as well. Novel approaches also need to take into consideration the technological challenges and opportunities given by new interaction contexts, ranging from mobile, touch, and gesture interaction to visualizations on large displays, and encompassing highly responsive web applications.

There is no one-size-fits-all solution but different use cases demand different visualization and interaction techniques. The evaluation of such interfaces and techniques poses another relevant concern given the specific challenges of visualizing data imbued with semantic complexity. Ultimately, providing better user interfaces, visual representations and interaction techniques will foster user engagement and likely lead to higher quality results in different applications employing ontologies and proliferate the consumption of Linked Data.

These and related issues are addressed by the VOILA! workshop series concerned with Visualization and Interaction for Ontologies and Linked Data. The sixth edition of VOILA! was co-located with the 20th International Semantic Web Conference (ISWC 2021) and took place as a half-day virtual event on October 25, 2021. It was organized around scientific paper presentations and discussions.
The call for papers for VOILA! 2021 attracted 13 submissions in different paper categories. At least three reviewers were assigned to each submission. Based on the reviews, we selected 10 contributions for presentation at the workshop.

We thank all authors for their submissions and all members of the VOILA! program committee for their useful reviews and comments. We are also grateful to Laura Hollink and Mayank Kejriwal, the workshop chairs of ISWC 2021, for their continuous support during the workshop organization.

October 2021

Contents

A First Step towards a Tool for Extending Ontologies
  by Mina Abdi Nikooie Pour, Huanyu Li, Rickard Armiento, Patrick Lambrix ........................................... 1

A Survey on User Interaction with Linked Data
  by Mariana Aguiar, Sérgio Nunes, Bruno Giesteira .................. 13

Visual Presentation of SPARQL Queries in ViziQuer
  by Kārlis Čerāns, Julija Ovcinnikova, Mikus Grasmanis, Lelde Lace, Aiga Romane ................................. 29

Fast Approximate Autocompletion for SPARQL Query Builders
  by Gabriel de la Parra, Aidan Hogan ............................ 41

RepOSE-CTab - A Protégé Plugin for Completing Ontologies
  by Zlatan Dragisic, Ying Li, Patrick Lambrix .................. 56

KG Explorer: a Customisable Exploration Tool for Knowledge Graphs
  by Thibault Ehrhart, Pasquale Lisena and Raphaël Troncy ... 63

Timelining Knowledge Graphs in the Browser
  by Damien Graux, Fabrizio Orlandi, Tanmay Kaushik, David Kavanagh, Hailing Jiang, Brian Bredican, Matthew Grouse, Dáithí Geary .......................................................... 76

VOWLMap: graph-based ontology alignment visualization and editing
  by Ana Guerreiro, Catia Pesquita, Daniel Faria .................. 82

VizKG: A Framework for Visualizing SPARQL Query Results over Knowledge Graphs
  by Hana Raissya, Fariz Darari, Fajar J. Ekaputra ................ 95

Displaying triple provenance with extensions of Fresnel
  by Lloyd Rutledge, Pascal Mellema, Tije Pietersma, Stef Joosten 103
