PREFACE

In front of you, there are the proceedings of the 6th International Scientific and Practical Conference «Distance Learning Technologies» (DLT'2021).

The Conference was held at Humanities and Education Science Academy (Branch) of V.I. Vernadsky Crimean Federal University in Yalta, Crimea, from 20 th to 22 th September 2021.

The Conference, as before, was organized jointly by V.I. Vernadsky Crimean Federal University and Saint Petersburg Electrotechnical University "LETI".

It brought together over 200 researchers, scientists, graduate students and undergraduate students from diverse research domains and from different locate. In particular, the conference was attended by figures of science and education from 62 higher educational institutions and scientific organizations of Russia, as well as 12 universities abroad.

The conference is intended to exchange experiences in the application of computer science and information technology in the interdisciplinary research and to discuss the latest advances in the basic and applied research in this field between scientists, and also attract young people to advanced scientific research. The conference participants got the discussion platform for share the latest trends in training and research programs for future specialists in computer science, digital economy and pedagogical sciences in context of distance learning.

The main topics of discussions are as follows:

- Modern paradigms of open educational space;
- End-to-end technologies in creating an educational environment;
- Distance technologies in inclusive education;
- Modeling of complex systems;
- Information systems and technologies in economics and management;
- Information security and cyber resistance.

There were 187 papers submitted for peer-review to the conference. Out of these, 37 papers were accepted for this volume, 12 as regular papers and 25 as short papers.
