Preface

In February 2022, we had the pleasure to organize the 14th edition of the ZEUS Workshop planned in Hannover, Germany. Due to the ongoing covid-19 pandemic, the workshop was held virtually, giving us the chance to also invite our PC members which are one of ZEUS' success factors. Thanks a lot for your reviewing work and the ongoing support.

This workshop series offers young researchers an opportunity to present and discuss early ideas and work in progress as well as to establish contacts among young researchers. For this year’s edition, we selected all twelve submissions for presentation at the workshop. Each submission went through a thorough peer-review process and was assessed by at least four members of the program committee with regard to its relevance and scientific quality. The accepted contributions cover the areas of Business Process Management, Cloud Computing, Microservices, Software Design, and the Internet of Things.

The workshop program was further enriched by keynotes from both academia and the industry. Niall Deehan from Camunda Services GmbH gave a talk about the functionality of Camunda Modeler for Fixing Shortfalls of REST in Modern architectures. Prof. Dr. Kurt Schneider from the University Hannover presented his research insights on A Socio-Technical Perspective on BPMN. The best presentation award was given to Elias Baalmann from the University Hannover for his presentation on Algorithmic Classification of Layouts of BPMN Diagrams.

The workshop was generously sponsored by Camunda Services GmbH.

# Table of Contents

Towards an Experiment for Analyzing Subprocess Navigation in BPMN Tooling ........................................... 1  
Daniel Lübke and Maike Ahrens

Towards a Framework for Business Process Sustainability Analysis ......... 6  
Finn Klessascheck

Towards Retrograde Process Analysis in Running Legacy Applications . . 11  
Marius Breitmayer, Lisa Arnold and Manfred Reichert

A Vision for Explainability of Coordinated and Conflicting Adaptingions in Self-Adaptive Systems .................................................. 16  
Sandro Speth, Sarah Stieß and Steffen Becker

Decision Support for Knowledge-Intensive Processes ....................... 20  
Anjo Seidel and Stephan Haarmann

A Review of Approaches for Quality Model Validations in the Context of Cloud-native Applications ........................................... 30  
Robin Lichtenstein and Guido Wirtz

Algorithmic Classification of Layouts of BPMN Diagrams .................. 42  
Elias Baalmann and Daniel Lübke

Preserving Data Consistency in Process Choreographies by Design ....... 51  
Tom Lichtenstein

Process Mining on Video Data .......................................... 56  
Arvid Lepsien, Jan Bosselmann, Andreas Melfsen and Agnes Koschmider

Visual Decision Modeling for IoT-Aware Processes ...................... 63  
Yusuf Kirikkayis, Florian Gallik and Manfred Reichert

BPMN in the Wild: A Reprise ........................................... 68  
Jasmin Türker, Michael Völkle and Thomas S. Heinze

A Use Case-based Investigation of Low-Code Development Platforms .... 76  
Robin Lichtenhahler, Sebastian Böhm, Johannes Manner and Stefan Winzinger
