

Preface

This volume contains the papers presented at IWESQ 2021: 3rd International Workshop on Experience with SQuaRE series and its Future Direction held on December 8, 2021 in Taiwan (actually held online for the situation of COVID-19).

There were 10 submissions. Each submission was reviewed by three program committee members. The committee decided to accept 9 papers (including one position paper). The program includes two invited talks, but they are also reviewed similarly to the regular papers. Its acceptance rate is 90.0%.

The ISO/IEC 25000 (Systems and Software Quality Requirements and Evaluation: SQuaRE) series is a set of international standards for systems and software, data and IT service quality, which has been widely used for a couple of decades. In the research field, it have been also examined as a tool for performing various analyses and evaluations on systems and software quality.

The 3rd International Workshop on Experience with SQuaRE series and its Future Direction (IWESQ 2021) aims at sharing such research outcomes and issues, and experience of practical applications of the SQuaRE series, in order to promote much more fruitful research and practice for quality systems and software products.

Furthermore, we gratefully acknowledge the professional work of the international program committee members, who have contributed substantially with their highly qualified referee reports.

In addition, we owe great thanks to the APSEC conference organization members for their dedication and professionalism in taking care of the many aspects of conference management.

Moreover, we would like to thank the developers and other professional staff of EasyChair.org, who made it possible for us to use the resources of this excellent and comprehensive conference management system, from the call of papers and inviting reviewers, to handling paper submissions, communicating with the authors, and creating the online volume of the conference proceedings.

We also want to thank all presenters and attendees for actively contributing to the success of IWESQ 2021. We are looking forward to excellent presentations and fruitful discussions, which will broaden our professional horizons. All participants are invited to make new friends within the community of SQuaRE users.

Table of Contents

Approach to Develop Quality Model of Cloud Services	1
<i>Hyunchong Kim and Jae-Hyo Lee</i>	
Research on Quality Model and Measurement for Microservices	5
<i>Jinchuan Yu, Jianxin Ge and Jixin Sun</i>	
Data bias measurement: a geometrical approach through frames	11
<i>Andrea Trenta</i>	
Integrating SQuARE with ISO 31000 risk management to measure and mitigate software bias	17
<i>Alessandro Simonetta, Antonio Vetrò, Maria Cristina Paoletti and Marco Torchiano</i>	
Using the SQuARE series as a guarantee for GDPR compliance	23
<i>Alessandro Simonetta, Maria Cristina Paoletti and Alessio Venticinque</i>	
Context Coverage in “Quality in Use Model”	29
<i>Shinichi Fukuzumi</i>	
Requirement analysis for social acceptance of AI medical interview - from view of quality in use	31
<i>Natsuko Noda and Shinichi Fukuzumi</i>	
Survey on Testing of Autonomous Driving Systems	34
<i>Wenjie Chen, Zeyu Ma, Chao Wang, Mingang Chen and Lizhi Cai</i>	
A study on the evaluation method of SW test items to quantify BEMS quality	39
<i>A-Young Park and Sang-sin Park</i>	

Program Committee

Lizhi Cai	Shanghai Key Laboratory of Computer Software Evaluating & Testing
Bill Curtis	CAST
Shinichi Fukuzumi	RIKEN
Hyunchong Kim	TTA
Toshihiro Komiyama	NEC Corporation
Raúl Martínez	IRAM
Tsuyoshi Nakajima	Shibaura Institute of Technology
Domenico Natale	AgID
Yukio Tanitsu	ITSCJ
Andrea Trenta	TIM
Noriko Wada	Yamanashi Eiwa college
Yangyang Zhang	China Electronics Standardization Institute
Alessandro Simonetta	University of Rome
