The 3rd Workshop on Uncertainty Reasoning for the Semantic Web

The Uncertainty Reasoning Workshop is an exciting opportunity for collaboration and cross-fertilization between the uncertainty reasoning community and the Semantic Web community.

Effective methods for reasoning under uncertainty are vital for realizing many aspects of the Semantic Web vision, but the ability of current-generation web technology to handle uncertainty is extremely limited. Recently, there has been a groundswell of demand for uncertainty reasoning technology among Semantic Web researchers and developers.

This surge of interest creates a unique opening to bring together two communities with a clear commonality of interest but little history of interaction. By capitalizing on this opportunity, URSW could spark dramatic progress toward realizing the Semantic Web vision.

The intended audience for this workshop includes the following:

• Researchers in uncertainty reasoning technologies with interest in the Semantic Web.
• Semantic web developers and researchers.
• People in the knowledge representation community with interest in the Semantic Web.
• Ontology researchers and ontological engineers.
• Web services researchers and developers with interest in the Semantic Web.
• Developers of tools designed to support Semantic Web implementation, e.g., Jena developers, Protege and Protege-OWL developers.

We intend to have an open discussion on any topic relevant to the general subject of uncertainty in the Semantic Web (including fuzzy theory, probability theory, and other approaches). Therefore, the following list should be just an initial guide:

• Syntax and semantics for extending Semantic Web languages to include principled treatment of uncertain, incomplete information.
• Logical formalisms to support uncertainty in Semantic Web languages
• New forms to use uncertainty reasoning as a means of assessing whether similar terms in different ontologies refer to the same or similar concepts
• Architectures for applying plausible reasoning to the problem of ontology mapping
• Using fuzzy approaches to deal with imprecise concepts within ontologies
• The concept of a probabilistic ontology and its relevance to the Semantic Web
• Best practices for representing uncertain, incomplete, ambiguous, or controversial information in the Semantic Web
• The role of uncertainty as it relates to Web services
• Uncertainty-friendly interface protocols as a means to improve interoperability among Web services
• Uncertainty reasoning techniques applied to trust issues in the Semantic Web
• Existing implementations of uncertainty reasoning tools in the context of the Semantic Web
• Issues and techniques for integrating plausible inference tools
• The future of uncertainty reasoning for the Semantic Web
URSW 2007 Program Committee

Ameen Abu-Hanna - Universiteit van Amsterdam, the Netherlands.
Fernando Bobillo - University of Granada, Spain.
Paulo C. G. Costa - George Mason University, USA.
Fabio G. Cozman - Universidade de Sao Paulo, Brazil.
Claudia d'Amato - University of Bari, Italy.
Ernesto Damiani - University of Milan, Italy.
Nicola Fanizzi - University of Bari, Italy.
Francis Fung - Information Extraction & Transport, Inc., USA.
Linda van der Gaag - Universiteit Utrecht, the Netherlands.
Ivan Herman - C.W.I., the Netherlands. W3C Activity Lead for the Semantic Web.
Kathryn B. Laskey - George Mason University, USA.
Kenneth J. Laskey - MITRE Corporation, USA. Member of the W3C Advisory Board.
Thomas Lukasiewicz - Università di Roma "La Sapienza", Italy.
Trevor Martin - University of Bristol, UK.
Bill McDaniel - DERI, Ireland.
Matthias Nickles - Technical University of Munich, Germany.
Leo Obrst - MITRE Corporation, USA.
Yung Peng - University of Maryland, Baltimore County, USA.
Michael Pool - Contera, Inc., USA.
Livia Predoiu - Universität Mannheim, Germany.
Dave Robertson - University of Edinburgh, UK.
Daniel Sánchez - University of Granada, Spain.
Elie Sanchez - Université de La Méditerranée Aix-Marseille II, France.
Oreste Signore - Istituto di Scienza e Tecnologie dell' Informazione "A. Faedo", Italy. Manager of the W3C Office in Italy
Nematollaah Shiri - Concordia University, Canada.
Sergej Sizov - University of Koblenz-Landau, Germany.
Pavel Smrz - Brno University of Technology, Czech Republic.
Umberto Straccia - Istituto di Scienza e Tecnologie dell' Informazione "A. Faedo", Italy.
Heiner Stuckenschmidt - Universität Mannheim, Germany.
Masami Takikawa - Cleverset, Inc., USA.
Peter Vojtas - Charles University, Czech Republic.
