

Jens Otten
Wolfgang Bibel (Eds.)

Automated Reasoning with Connection Calculi

**1st International Workshop, AReCCa 2023,
Prague, Czech Republic, September 18th, 2023**

Proceedings

Originally published online by

CEUR Workshop Proceedings (CEUR-WS.org)

Organization

Program Committee

Christoph Benz Müller	University of Bamberg, Germany
Wolfgang Bibel	Technical University of Darmstadt, Germany – co-chair
Chad Brown	Czech Technical University in Prague, Czech Republic
David Cerna	Czech Academy of Sciences, Czech Republic
Michael Färber	University of Innsbruck, Austria
Didier Galmiche	LORIA - Université de Lorraine, France
Sean Holden	University of Cambridge, UK
Cezary Kaliszyk	University of Innsbruck, Austria
Jens Otten	University of Oslo, Norway – co-chair
Michael Rawson	TU Wien, Austria
Stephan Schulz	DHBW Stuttgart, Germany
Josef Urban	Czech Technical University in Prague, Czech Republic
Christoph Wernhard	University of Potsdam, Germany
Zsolt Zombori	Hungarian Academy of Sciences, Hungary

Editors & Workshop Chairs

Jens Otten
Department of Informatics
University of Oslo
Gaustadalléen 23 B, 0373 Oslo, Norway

Contents

AReCCa 2023 – Automated Reasoning with Connection Calculi <i>Jens Otten and Wolfgang Bibel</i>	1–3
20 Years of leanCoP - An Overview of the Provers <i>Jens Otten</i>	4–22
A Curiously Effective Backtracking Strategy for Connection Tableaux <i>Michael Färber</i>	23–40
nanoCoP-Omega: A Non-Clausal Connection Prover with Arithmetic <i>Leo Repp and Mario Frank</i>	41–53
Embedding the Connection Calculus in Satisfiability Modulo Theories <i>Clemens Eisenhofer, Laura Kovács and Michael Rawson</i>	54–63
Structure-Generating First-Order Theorem Proving <i>Christoph Wernhard</i>	64–83
A Syntax for Connection Proofs <i>Jens Otten and Sean B. Holden</i>	84–94
Connect++: A New Automated Theorem Prover Based on the Connection Calculus <i>Sean B. Holden</i>	95–106
Connections: Markov Decision Processes for Classical, Intuitionistic and Modal Connection Calculi <i>Fredrik Rømming, Jens Otten and Sean B. Holden</i>	107–118
Comparison of Proof Methods <i>Wolfgang Bibel</i>	119–132
