

TACC 2023

**3rd Tunisian-Algerian Joint
Conference on Applied
Computing**

**December 6 – 8, 2023
Sousse, Tunisia**

Preface

The Tunisian Algerian Conference on Applied Computing (TACC 2023) is a platform for keeping up with advances and changes to a consistently evolving field. Leading researchers and industry experts from Tunisia and Algeria will present the latest studies through papers and oral presentations. This conference edition is dedicated to the study of applied research of real-world problems. It aims to address, both theoretical and applied computer science issues. The TACC 2023 contributions are devoted to the following fields, but is not limited to:

- Artificial Intelligence and Agents
- Distributed Systems
- Information Systems
- Software Engineering
- Software Architecture
- System and Software Security
- Algorithms, automata, and complexity
- Logic, semantics, and theory of programming
- Static analysis, verification, and testing
- Applications of IOT, AI, Cloud and BIG Data for environmental sustainability

In response to the call for papers, 44 papers were submitted. Each paper was reviewed by at least three reviewers and evaluated based on the originality, quality, and relevance to the conference topics. The Program Committee selected 18 papers as full papers for publication in the proceedings and presentation at the Conference. The program was completed with excellent invited talks given by Khalil Drira (Research Director, LAAS-CNRS, Toulouse, France) and Chouki Tibermacine (Associate Professor, Montpellier University, France).

We would like to express our appreciation to the authors of the submitted papers, the Program Committee members, and the external reviewers. We owe special thanks to the Organizing Committee members for the hard work they did locally in Sousse.
