

# **5th Open Knowledge Conference (OKCon) 2010**

–Conference Proceedings–

## Preface

The 5th Open Knowledge Conference (OKCon) is an interdisciplinary conference that brings together individuals from across the open knowledge spectrum for a day of presentations and workshops.

Open knowledge promises significant social and economic benefits in a wide range of areas from governance to science, culture to technology. Opening up access to content and data can radically increase access and reuse, improving transparency, fostering innovation and increasing societal welfare.

This is a time of great change. In addition to high profile initiatives such as Wikipedia, OpenStreetMap and the Human Genome Project, there is enormous growth among open knowledge projects and communities at all levels. Moreover, in the last year, many governments across the world have begun opening up their data.

And it doesn't stop there. In academia, open access to both publications and data has been gathering momentum, and similar calls to open up learning materials have been heard in education. Furthermore this gathering flood of open data and content is the creator and driver of massive technological change. How can we make this data available, how can we connect it together, how can we use it collaborate and share our work?

We thank all members of the program committee for providing their time and expertise for selecting the presentations and papers. All their help made this conference possible.

We hope that you will enjoy the conference.

*Sören Auer*  
*Jonathan Gray*  
*Claudia Müller-Birn*  
*Rufus Pollock*  
*Sara Wingate Gray*

## Program Committee

Sören Auer, AKSW/Universität Leipzig  
Christopher Corbin, UK Advisory Board on Public Sector Information (APPSI)  
Adnan Hadzi and Andrea Rota, Goldsmiths College, University of London  
Claudia Müller-Birn, Carnegie Mellon University  
Peter Murray-Rust, University of Cambridge  
Rufus Pollock, Open Knowledge Foundation and Emmanuel College, University of Cambridge  
Joseph Seddon, Wikimedia UK  
Jo Walsh, EDINA and Open Knowledge Foundation  
John Wilbanks, Science Commons

# Table of Contents

## Full Paper

Anke Linz, Olaf Resch

**Double Loop Learning in Work based Settings**

Maarten Marx, Arjan Nusselder

**What you say is who you are. How open government data facilitates profiling politicians**

Annie Berry, Edson Burton, Ryan Northey

**From real to digital communities: Building a software archive for Trinity Community Arts**

Christopher Gutteridge

**Using the Institutional Repository to publish research data**

Eun-kyung Kim, Matthias Weidl, Key-Sun Choi, Sören Auer

**Towards a Korean DBpedia and an Approach for Complementing the Korean Wikipedia based on DBpedia**

Tom Morris, Daniel Mietchen

**Collaborative Structuring of Knowledge by Experts and the Public**

Thomas Schandl, Andreas Blumauer

**Utilizing, creating and publishing Linked Open Data with the Thesaurus Management Tool PoolParty**

## Short Paper

Jason J. Hoyt, Jan Reichelt, Victor Henning

**Building successful online research networks with the Last.fm model**

Katleen Janssen, Joep Crompvoets

**Access or Re-use of PSI? A Cookie if You Get it Right!**
