Preface

DATESO 2013, the international workshop on current trends on Databases, Information Retrieval, Algebraic Specification and Object Oriented Programming, was held on April 17 – 19, 2013 in Písek.

The 13th year was organized by Department of Computer Science VŠB-Technical University Ostrava, Department of Software Engineering MFF UK Praha, Department of Computer Science and Engineering FEL ČVUT Praha, and Working group on Computer Science and Society of Czech Society for Cybernetics and Informatics. The DATESO workshops aim for strengthening connections between these various areas of informatics, particularly this year, Semantic Web, semistructured data, social networks, and formal specifications.

The proceedings of DATESO 2013 are also available at DATESO Web site: http://www.cs.vsb.cz/dateso/2013/ and CEUR Workshop Proceeding site: http://www.ceur-ws.org/Vol-971/ (ISSN 1613-0073). The Program Committee selected 14 papers (7 full papers and 7 posters) from 21 submissions, based on two independent reviews.

We wish to express our sincere thanks to all the authors who submitted papers, the members of the Program Committee, who reviewed them on the basis of originality, technical quality, and presentation. We are also thankful to the Organizing Committee and Amphora Research Group (ARG, http://www.cs.vsb.cz/arg/) for preparation of workshop proceedings. Special thanks belong to Czech Society for Cybernetics and Informatics.

April, 2013

V. Snášel, K. Richta, J. Pokorný (Eds.)
Table of Contents

Full Papers

On Estimation of the Spatial Clustering: Case Study of Epidemiological Data In Olomouc Region, Czech Republic ........................................... 1
Lukáš Marek, Vít Pászto, Jiří Dvorský, Pavel Tuček

Towards a Runtime Code Update in Java ........................................... 13
Marcel Hlopko, Jan Kurš, Jan Vraný

Are Shape Metrics Useful for a Geocomputation? CORINE Land-Cover Analysis Case Study ......................................................... 26
Vít Pászto, Lukáš Marek, Pavel Tuček

QuickXDB: A Prototype of a Native XML DBMS ......................... 36
Petr Lukáš, Radim Bača, Michal Krátký

Efficient in-memory data structures for n-grams indexing .............. 48
Daniel Robenek, Jan Plašoš, Václav Snášel

P system based model of passenger flow in public transportation systems: a case study of Prague Metro ........................................... 59
Zbyněk Janoška, Jiří Dvorský

How can formalization of SOA help in finding solutions for IT systems . . 70
Zdeněk Skřivánek, Karel Richta

Short papers

Comparative Summarization via Latent Dirichlet Allocation ............ 80
Michal Campr, Karel Jezek

Using Retinex and SVD Algorithms for Detection of Frayed Edge in Steel Plate ................................................................. 87
Michal Holiš, Martin Plaček, Jiří Dvorský, Jan Martinovič, Pavel Moravec

Application of Relative Derivation Terms by Polynomial Neural Networks 98
Ladislav Zjavka

Evolution of Co-Authors Communities Formed by Terms on DBLP ...... 109
Alisa Babskova, Pavla Dráždílová, Jan Martinovič, Václav Svatoň, Václav Snášel
A Linguistic Method into Stemming of Arabic for Data Compression .... 119
Hussein Soori, Jan Platoš, Václav Snášel

Searching Time Series Based On Pattern Extraction Using Dynamic Time Warping ................................................................. 129
Tomáš Kocyan, Jan Martinovič, Pavla Dráždilová, Kateřina Slaninová

On Updating in XML Peer-to-Peer Databases ......................... 139
Adam Šenk, Michal Valenta

Author Index ................................................................. 149
