

Preface

This volume contains the papers presented at LD4IE2016: Linked Data for Information Extraction held on October 18th, 2016 in Kobe, Japan, in conjunction with the 15th International Semantic Web Conference (ISWC2016).

Additional details on the LD4IE workshop series can be found at <https://w3id.org/ld4ie>.

The workshop this year features 3 full papers, 1 positional paper and 2 expert highlights papers. "Expert highlights", a novelty that we introduced this year at the workshop, are papers by researchers with established track record on specific and critical topics in the field on Information Extraction.

Specifically, Saif et al. address the topic of extracting and analysing sentiment from social media contents, while Mazumdar and Zhang report novel findings about visualization techniques for Information Extraction, specifically dealing with extraction from Web tables.

The invited speaker for LD4IE2016 is Dr. Valentina Presutti, a researcher and team coordinator at the Semantic Technology Laboratory of the National Research Council (CNR) in Rome and Catania. She has more than ten years of experience in managing research and development projects in domains such as open data, data integration, knowledge extraction, content and knowledge management, natural language understanding, and ICT for eHealth. Her talk at LD4IE2014 is titled "Knowledge Extraction and Linked Data: Playing with Frames".

October 3, 2016
Mannheim

Anna Lisa Gentile

Table of Contents

Knowledge Extraction and Linked Data: Playing with Frames	1
<i>Valentina Presutti</i>	
A Tool for Creating and Visualizing Semantic Annotations on Relational Tables	2
<i>Suvodeep Mazumdar and Ziqi Zhang</i>	
A Linked Open Data Approach for Sentiment Lexicon Adaptation	11
<i>Hassan Saif, Miriam Fernandez, Leon Kastler and Harith Alani</i>	
Word Frame Disambiguation: Evaluating Linguistic Linked Data on Frame Detection	23
<i>Aldo Gangemi, Mehwish Alam and Valentina Presutti</i>	
Multilingual Dictionary Linking and Aggregation: Quality from Consistency	32
<i>Kun Ji, Shanshan Wang and Lauri Carlson</i>	
Freedom for bibliographic references: OpenCitations arise	44
<i>Silvio Peroni, David Shotton and Fabio Vitali</i>	
Enhancing Open Data to Linked Open Data with ODMiner	56
<i>Francesco Poggi, Gabriele Cigna and Andrea Giovanni Nuzzolese</i>	

Program Committee

Nitish Aggarwal	Insight-Centre NUI Galway
Payam Barnaghi	University of Surrey
Pierpaolo Basile	Dipartimento di Informatica - University of Bari
Amparo E. Cano	Knowledge Media Institute, The Open University
Claudia D'Amato	University of Bari
Brian Davis	Insight Centre for Data Analytics, Galway
Ernesto William De Luca	Georg-Eckert-Institute – Leibniz-Institute for international Textbook Research
Anca Dumitrache	VU University Amsterdam
Miriam Fernandez	Knowledge Media Institute
Anna Lisa Gentile	University of Mannheim
Katja Hose	Aalborg University
Ashutosh Jadhav	IBM
Craig Knoblock	University of Southern California
Petr Knoth	Knowledge Media institute
Tobias Kuhn	VU University Amsterdam
Andrea Moro	Microsoft
Varish Mulwad	University of Maryland, Baltimore County
Matthias Nickles	National University of Ireland, Galway, Digital Enterprise Research Institute
Andrea Giovanni Nuzzolese	STLab, ISTC-CNR
Heiko Paulheim	University of Mannheim
Simone Paolo Ponzetto	University of Mannheim
Jay Pujara	University of Maryland
Will Radford	Hugo Australia
Achim Rettinger	AIFB
Martin Riedl	TU Darmstadt
Giuseppe Rizzo	ISMB
Tim Rocktäschel	University College London
Jodi Schneider	University of Pittsburgh
Monika Solanki	University of Oxford
Victoria Uren	Aston University
Ziqi Zhang	University of Sheffield
