

Preface

The International Workshop on Description Logics is the main annual event of the Description Logic research community. It is the forum at which those interested in description logics, from both academia and industry, meet to discuss ideas, share information, and compare experiences. The workshop explicitly welcomes submissions from researchers that are new to the area and provides quality feedback via peer-reviewing, while at the same time being of an inclusive nature with a very high acceptance rate. There are only informal (electronic) proceedings and inclusion of a paper in this proceedings should not preclude its publication at conferences. Further information can be found on the DL web-pages at <http://dl.kr.org/>.

This volume contains the papers presented at the 32nd International Workshop on Description Logics (DL 2019) held from June 18 to June 21, 2019, in Oslo, Norway. Every submission to the workshop received three reviews provided by 57 PC members and 15 additional external reviewers. Overall, the committee decided to accept 31 full papers and 25 extended abstracts. The contents of these papers were presented in 17 talks of 22 minutes each, 23 talks of 17 minutes, and 16 posters. The program additionally included three invited talks by Pablo Barceló (DCC, University of Chile & IMFD Chile), Meghyn Bienvenu (CNRS, University of Bordeaux, FR), and Gerhard Lakemeyer (RWTH Aachen, DE).

We thank all the PC members for their invaluable efforts in providing helpful and informative reviews for all submissions on time. The organization and reviewing process was simplified by the tools provided by EasyChair and CEUR. We also thank all our colleagues at the University of Oslo, including the general chairs Martin Giese and Arild Waaler, the publicity chair Evgenij Thorstensen, the local chair Jens Otten, and the financial chair Lise Reang, for all their considerable efforts in organizing and running the event. The workshop would not be possible without the submissions and participation of all the people that make DL such a great community. We are also very grateful to the Foundation for Principles of Knowledge Representation and Reasoning (KR Inc.), to the city of Oslo, to the Research Council of Norway, to Computas, and to DNV-GL for their sponsorship of the workshop at a level that made possible the participation of several students and young researchers as well as a best student contribution prize. A list of our sponsors can also be found on the workshop homepage <http://dl2019.ifi.uio.no/home.html>.
