

Preface to the Proceedings of the EKAW 2020  
Posters and Demonstrations Session  
co-located with 22nd International Conference on  
Knowledge Engineering and Knowledge  
Management (EKAW 2020)

Daniel Garijo  
Information Sciences Institute  
University of Southern California, USA

Agnieszka Ławrynowicz  
Center for Artificial and Machine Learning (CAMIL)  
Faculty of Computing and Telecommunications  
Poznan University of Technology, Poland

November 2020

This volume contains short papers presented at the Posters and Demos session of EKAW2020: 22nd International Conference on Knowledge Engineering and Knowledge Management (16-18 September 2020), held as a global online conference. EKAW is the renowned conference series concerned with all aspects about eliciting, acquiring, modeling and managing knowledge, and the construction of knowledge-intensive systems and services for the semantic web, knowledge management, e-business, natural language processing, and intelligent information integration. The special focus of EKAW2020 was on Ethical and Trustworthy Knowledge Engineering and Artificial Intelligence. The conference was originally planned to take place in Bozen-Bolzano as part of the Bolzano Summer of Knowledge (BOSK), but at the end, it was organized as a fully virtual conference.

We thank the General Chairs of EKAW2020, Oliver Kutz and Rafael Peñaloza (Free University of Bozen-Bolzano), and PC Chairs, Michel Du-

montier (Maastricht University) and Maria Keet (University of Cape Town) for all their work devoted to make the conference a very succesful event despite of the struggles of the year 2020 and the need for a completely new, online format of the conference.

We are grateful to Easychair for its highly functional conference management toolkit, and to CEUR-WS for its high-quality, volunteer-operated service to the computer science research community.

The Posters and Demos session at EKAW 2020 aimed to complement the research track by providing an opportunity to present and discuss late-breaking results, on-going projects and innovative prototypes. The informal setting of the PD session encourages presenters and participants to engage in discussions about the presented work. Such discussions can be invaluable inputs for the future work of the presenters, while offering participants an effective way to broaden their knowledge of the emerging research trends and to start collaborations with other researchers.

This year, the Posters and Demos session was chaired by Daniel Garijo and Agnieszka Lawrynowicz. We received a total of 14 submissions. The Program Committee accepted 8 submissions based on 3 reviews per submission. We thank all the authors for their submissions.

We are grateful to members of the Program Committee, without whom the session would not have been possible, comprising:

Pierre-Antoine Champin, LIRIS, UCBL1, Université de Lyon

Enrico Daga, The Open University

Ivan Donadello, Fondazione Bruno Kessler

Mauro Dragoni, Fondazione Bruno Kessler

Vadim Ermolayev, Zaporizhzhia National University

Paola Espinoza Arias, Universidad Politécnica de Madrid

Jesualdo Tomás Fernández Breis, Universidad de Murcia

Hamed Hassanzadeh, CSIRO

Zubeida Khan, Council for Scientific and Industrial Research, South Africa

Yuang-Fang Li, Monash University

Albert Meroño Peñuela, Vrije Universiteit Amsterdam

Pascal Molli, University of Nantes

Grzegorz Nalepa, Jagiellonian University, AGH University of Science and Technology

Andrea Giovanni Nuzzolese, University of Bologna

Jedrzej Potoniec, Poznan University of Technology

Maria Poveda-Villalon, Ontology Engineering Group, Universidad Politecnica de Madrid

Simon Scerri, Fraunhofer IAIS

Hala Skaf-Molli, University of Nantes

Valentina Tamma, University of Liverpool

Jürgen Umbrich, Vienna University of Economics and Business
