Overview

LASI-Nordic draws together the Nordic Learning Analytics community to learn from experts, to share research and experience, and to investigate if there is a Nordic approach to learning analytics. During the event there will be keynote talks, hands-on workshops, tutorials, panels, and a firehose & poster/demo session in which to participate. First and foremost, however, LASI-Nordic 2021/22 will be a chance for participants to share, discuss, and shape, how the Nordic countries use/want to use Learning Analytics to improve learning and teaching. Furthermore, the aim is to facilitate collaboration and sharing of knowledge on Learning Analytics within the Nordic community, and to determine if there is interest in developing a Nordic Special Interest Group (SIG) on Learning Analytics. The event is run in cooperation with Society for Learning Analytics Research (SoLAR). For more information, visit the event [homepage](#).
