Preface

This volume contains the papers presented at the fifth international conference RTA-CSIT 2023: Recent Trends and Applications in Computer Science and Information Technology held on April 26-27, 2023 in Tirana, Albania. The conference has been organized once more by the Department of Informatics, Faculty of Natural Sciences, University of Tirana, Albania.

All accepted research works were presented on-site during the conference sessions. After the last virtual edition, this was a very welcomed comeback that allowed for lively discussions during the authors' presentations.

Participants of this edition presented research works from Albania, Kosovo, North Macedonia, Croatia, and Italy. We had the pleasure to host first time participants and also returning authors from the now very well established conference community.

30 papers were submitted for peer review to this conference. Out of these 11 were accepted as full papers and 6 were accepted as short papers.

The key topics of the conference related once again to machine learning, artificial intelligence, and data analytics. Other topics included ICT teaching methods, cloud technologies, eHealth, and security.

Looking forward for future collaborations, we would like to thank you all participants and reviewers for their contributions.
