Abstract
In the face of continuously changing contextual conditions and ubiquitous disruptive crisis events, the concept of resilience refers to some of the most urgent, challenging, and interesting issues of nowadays society. Economic value networks, technical infrastructures, health systems, and social textures alike need to unfold capacities to withstand, adapt, recover, or even refine and transform themselves to stay ahead of changes.

Keywords
Crisis Information, Resilience, Knowledge Graphs, Linked Data, Semantic Web, CoyPu

The D2R'24 workshop (https://2024.d2r2.aksw.org/), which is organized by the CoyPu project (https://coypu.org/), provides an open forum to exchange current issues, ideas, and trends in the area of Data-driven Resilience Research among scientists, software engineers, resilience practitioners, and domain experts. Ongoing technological developments, current research approaches as well as use case scenarios, and field reports are presented and discussed with a broad and multi-disciplinary specialist audience. We have received contributions of novel results, ongoing work, and position papers focusing on various aspects of Data-driven Resilience Research from a scientific or practical perspective.

The workshop is held during the 21st European Semantic Web Conference (ESWC 2024) in Crete, Greece. The co-location of the workshop with the ESWC 2024 allows a wide exchange among the community of Semantic Web experts, data scientists, knowledge engineers, and further interested parties.

For the workshop, we received a total of 9 contributions, out of which 7 were selected to be included in the proceedings.

The D2R2 workshop's first issue [1] was held at the Data Week Leipzig 2022.

Program Committee

- Allard Oelen, Technische Informationsbibliothek (TIB), Hannover, Germany
- Angelie Kraft, University of Hamburg, Germany
- Edgard Marx, Senior Linked Data Expert, eccenca GmbH and HTWK Leipzig, Germany
- Enrique Iglesias, L3S Research Center, Leibniz University of Hannover, Germany
- Felix Engel, Technische Informationsbibliothek (TIB), Hannover, Germany
- Junbo Huang, University of Hamburg, Germany
- Longquan Jiang, University of Hamburg, Germany
- Magnus Knuth, eccenca GmbH, Hainstraße 8, 04109 Leipzig, Germany
- Milan Dojchinovski, Institute for Applied Informatics, Leipzig, Germany
- Nenad Krdavac, Technische Informationsbibliothek (TIB), Hannover, Germany
- Patrick Westphal, University of Hamburg, Germany
- Paulo Ricardo Viviurka Do Carmo, HTWK Leipzig, Germany
- Sabine Gründer-Fahrer, Institute for Applied Informatics, Leipzig, Germany
- Simon Bin, Institute for Applied Informatics, oerdelerring 9, 04109 Leipzig, Germany
- Xi Yan, University of Hamburg, Germany

Acknowledgments
