

Ontology Matching

OM-2024

Proceedings of the ISWC Workshop

Introduction

Ontology matching¹ is a key interoperability enabler for the semantic web, as well as a useful tactic in some classical data integration tasks dealing with the semantic heterogeneity problem. It takes ontologies as input and determines as output an alignment, that is, a set of correspondences between the semantically related entities of those ontologies. These correspondences can be used for various tasks, such as ontology merging, data interlinking, query answering or navigation over knowledge graphs. Thus, matching ontologies enables the knowledge and data expressed with the matched ontologies to interoperate.

The workshop had three goals:

- To bring together leaders from *academia*, *industry* and *user institutions* to assess how research advances are addressing real-world requirements. The workshop strives to improve academic awareness of industrial and final user needs, and therefore, direct research towards those needs. Simultaneously, the workshop serves to inform industry and user representatives about existing research efforts that may meet their requirements. The workshop also investigates how the ontology matching technology is going to evolve.
- To conduct an extensive and rigorous evaluation of ontology matching and instance matching (link discovery) approaches through the OAEI (Ontology Alignment Evaluation Initiative) 2024 campaign².
- To examine similarities and differences from other, old, new and emerging, techniques and usages, such as process matching, web table and knowledge graph matching tasks or knowledge embeddings.

The program committee selected 6 submissions (4 full papers and 2 poster papers) for the presentation during the workshop. 13 matching systems participated in this year's OAEI campaign. Further information about the Ontology Matching workshop can be found at: om.ontologymatching.org/2024/.

Acknowledgments. We thank all members of the program committee, authors and local organizers for their efforts. We appreciate support from Trentino Digitale³, the EU SEALS (Semantic Evaluation at Large Scale) project, the EU HOBBIT (Holistic Benchmarking of Big Linked Data) project, the MELT (Matching Evaluation Toolkit) project⁴, the Pistoia Alliance Ontologies Mapping project⁵, IBM Research⁶ and SIRIUS Centre for Scalable Data Access⁷.

Table of Contents

Long Technical Papers

A Gold Standard Benchmark Dataset for Digital Humanities <i>Felix Kraus, Nicolas Blumenröhr, Germaine Götzelmann, Danah Tonne and Achim Streit</i>	1
A Scalable Method for Large-scale Entity Alignment via Multi-Channel Retrieval and Fusion <i>Ningxin Chen and Zhichun Wang</i>	18
MDMapper: A Framework for Aligning Master Data Models Using Ontology Matching Techniques <i>Xianhao Liu, Jesper Grode and Michael R. Hansen</i>	30
Towards Generating Complex Alignments with Large Language Models via Prompt Engineering <i>Guilherme Henrique Santos Sousa, Rinaldo Lima and Cássia Trojahn</i>	43

Short Technical Papers

Towards Tailoring Ontology Embeddings for Ontology Matching Tasks <i>Sevinj Teymurova, Ernesto Jiménez-Ruiz, Tillman Weyde and Jiaoyan Chen</i>	57
Enhancing Entity Matching Through Systematic Association of Matchers to Linking Problem Types <i>Chloé Khadija Jradeh, Konstantin Todorov and Cássia Trojahn</i>	61

OAEI Papers

Results of the Ontology Alignment Evaluation Initiative 2024 <i>Mina Abd Nikooie Pour, Alsayed Algergawy, Eva Blomqvist, Patrice Buche, Jiaoyan Chen, Adrien Coulet, Julien Cufi, Hang Dong, Daniel Faria, Lucas Ferraz, Pedro Giesteira Cotovio, Yuan He, Sven Hertling, Ian Horrocks, Liliana Ibanescu, Sarika Jain, Ernesto Jiménez-Ruiz, Naouel Karam, Felix Kraus, Patrick Lambrix, Huanyu Li, Ying Li, Pierre Monnin, Heiko Paulheim, Catia Pesquita, Abhisek Sharma, Pavel Shvaiko, Marta Silva, Guilherme Sousa, Cássia Trojahn, Jana Vataščinová, Beyza Yaman, Ondřej Zamazal, and Lu Zhou</i>	64
MDMapper Results for OAEI 2024 <i>Xianhao Liu, Michael R. Hansen and Jesper Grode</i>	98
Results for BioGITOM in OAEI 2024 <i>Samira Oulefki, Lamia Berkani, Ladjel Bellatreche, Nassim Boudjenah and Aicha Mokhtari</i>	104
Results in OAEI 2024 for Matcha <i>Daniel Faria, Marta C. Silva, Pedro Cotovio, Lucas Ferraz, Laura Balbi and Catia Pesquita</i>	110
ALIN Results for OAEI 2024 <i>Jomar da Silva, Kate Revoredo, Fernanda Araujo Baião and Cabral Lima</i>	118
OntoMatch Results for OAEI 2024 <i>Julian Sampels</i>	124
BioSTransMatch Results @ OAEI 2024 <i>Safaa Menad, Saïd Abdeddaïm and Lina F. Soualmia</i>	132
HybridOM: Ontology Matching using Hybrid Search <i>Marius-Horatiu Totoian, Anca Marginean, Philipp Blohm and Mir Nawab Hussain</i>	138
TOMATO: results of the 2024 OAEI evaluation campaign <i>Philippe Roussille and Olivier Teste</i>	146
Results of CANARD in OAEI 2024 <i>Guilherme Sousa, Rinaldo Lima and Cássia Trojahn</i>	156
LogMap Family Participation in the OAEI 2024 <i>Ernesto Jiménez-Ruiz</i>	161
