

# ICSOB Poster and Demo Track 2024 Preface

Edona Elshan<sup>1</sup>

<sup>1</sup>*Vrije Universiteit Amsterdam, the Netherlands*

The International Conference on Software Business (ICSOB) is focused on software-intensive businesses from the Software Engineering and Information Systems perspectives. In 2024, ICSOB accepted posters and demos as a part of the conference, which included, in addition to the physical presentation at the conference venue, an extended abstract of up to four pages. These posters and demos and their extended abstracts focused on topics related to startups, requirements prioritization, artificial intelligence, hybrid work, agile software development, productivity, IT infrastructure management, green ICT, business ecosystems, sustainability, and software ecosystems. Each poster was peer-reviewed by at least two program committee members, and two posters or demos were accepted this way as extended abstracts. They showcase early and mid-stage research results focusing on these themes. At the venue, we had a poster session where the conference participants could go from poster to poster (or demo) while having discussions with the authors of the posters. We thank the authors for their submissions to this track, as well as the program committee for reviewing them.

## Poster and Demo Track Chairs

Edona Elshan, Vrije Universiteit Amsterdam, Netherlands

## Program Committee

Dominik Siemon, LUT University, Finland

Dron Khan, BFree University of Bozen-Bolzano, Italy

Rodrigo Santos, Federal University of the State of Rio de Janeiro, Brazil
