

Preface

The FGWM Workshop 2024 is an annual workshop organized by the Special Interest Group (SIG) Knowledge Management of the German Informatics Society (GI).

The FGWM Workshop this year is colocated with the German AI conference and is held in attendance at the University of Potsdam. The attendance of numerous participants with the other workshops at the German AI conference is a great contribution to the goal of interaction among the special interest groups.

The papers of the workshop are peer-reviewed and selected by an independent program committee. The committees decide to accept 6 full research papers for inclusion in the proceedings. The program consists of several sessions that include contributions of interest for all conference participants.

The workshop chairs thank the organizers of the German AI conference for their efforts and the integration of our workshop into the conference program.

Potsdam September 19th, 2025
