CAiSE 2026

Research Projects Exhibition Papers

Proceedings

This volume of the CEUR-WS Proceedings contains 6 Research Projects Exhibition papers presented at the 38th International Conference on Advanced Information Systems Engineering (CAiSE 2026). The conference was held in Verona, Italy, 8–12 June 2026.

Preface

This volume of the CEUR-WS proceedings presents the accepted contributions to the Research Projects Exhibition (RPE@CAiSE'26), held in conjunction with the 38th edition of the International Conference on Advanced Information Systems Engineering (CAiSE 2026). CAiSE 2026 took place in Verona, Italy, from June 8th to 12th, 2026, under the theme *Rethinking Information System Engineering in a continuously changing information system world*.

We are pleased to contribute to the CAiSE 2026 program with the fourth edition of the Research Projects Exhibition. The exhibition offers a dedicated forum for researchers and practitioners to present their ongoing research projects in the area of Information Systems Engineering. Its primary objectives are to disseminate intermediate project results, to gather feedback on research projects and project proposals under development, and to help participants find potential research partners, strengthen existing collaborations, and discuss novel research ideas.

Scope and topics. The call for papers invited short papers (5–8 pages) showcasing research projects that are relevant to the topics of CAiSE, covering:

- projects funded by the European Union, by national or local funding organizations, or by universities and industry;
- projects focused on fundamental research, applied research, or industry collaborations;
- research projects carried out by an international consortium of partners or by a national research team;
- research statements for future projects concerning the Information Systems Engineering community.

Each submission was asked to present the project's name, acronym, duration, participants, funding agency and URL; a summary of its objectives and expected tangible outputs; its relevance to the topics of CAiSE; and, for ongoing projects, its current status and intermediate results.

Important dates. Abstract submission: April 3, 2026. Paper submission: April 10, 2026. Notification of acceptance: April 24, 2026. Camera-ready submission: May 8, 2026.

Review process. Each submission was reviewed by at least two members of the program committee (including the chair); in case of disagreement, a third member reviewed the submission. Submissions were assessed on their relevance to CAiSE 2026. This edition received 6 submissions, all of which were accepted for presentation at the exhibition and are included in this proceedings volume.

We extend our sincere appreciation to the members of the program committee for their careful and timely reviews, and to all authors for their contributions. Special thanks go to the CAiSE 2026 organizing committee, whose efforts made this event possible.

We hope that this collection serves as a valuable resource and a source of inspiration for ongoing and future research in the field of Information Systems Engineering.
