Citation: Yang Shi, Shan Zhang, Peter Brusilovsky, Thomas Price, Bita Akram, Juho Leinonen, Andrew Lan, Paulo Carvalho, Ken Koedinger, Tiffany Barnes: Proceedings of 10th Educational Data Mining in Computer Science Education (CSEDM) Workshop. June 28, 2026, Seoul, South Korea (2026).

This volume¹ represents the proceedings of the selected papers of the 10th Educational Data Mining in Computer Science Education (CSEDM) Workshop (CSEDM 2026), held on June 28, 2026².

The objective of the CSEDM workshop series is to facilitate a discussion among the research community at the intersection of Educational Data Mining (EDM), AI and Computer Science Education. The workshops are interdisciplinary events, designed to bring this community together to share insights for how to support and understand learning in the domain of CS using data. Researchers, faculty and students present data mining approaches, methodologies and experiences where AI is transforming the way students learn Computer Science (CS) skills.

CSEDM received 10 submissions to the research papers track, of which 9 were accepted (90%); 7 submissions to the position papers or work-in-progress track, of which 3 papers were accepted (42.8%). Each paper was peer reviewed by our program committee in a double-blinded way, and decisions were made based on these reviews, as well as discussions by the workshop organizers.
