Abstract

The second edition of the International Workshop on Users and Knowledge Graphs (UKG) was held in Ghent, Belgium, on September 15, 2026, in conjunction with SEMANTiCS 2026.

Summary

This workshop explored how users understand, query, trust, and interact with knowledge graphs in a variety of real-world settings. Topics included user studies, interactive interfaces, explainability, accessibility, human-AI collaboration, and the design of knowledge graph systems that are usable by both technical and non-technical audiences. The goal of the event was to foster discussion among researchers, practitioners, and domain experts and to stimulate interdisciplinary collaboration across knowledge engineering, semantic technologies, and human-computer interaction.

In this second edition, we received five submissions. Each paper underwent a rigorous peer-review process with three reviews per paper, involving a mix of junior and senior reviewers. Ultimately, three papers were accepted for presentation.

The website of the workshop is: <https://ukgworkshop.github.io/>.

Program Committee

- Ademar Crotti Junior, Consultant at metaphacts, Germany
- Ahmet Soyly, Kristiania University College, Norway
- Anastasia Dimou, KU Leuven, Belgium
- Ben De Meester, Ghent University, Belgium
- Davan Chiem Dao, University of Liège, Belgium
- David Chaves-Fraga, University of Santiago de Compostela, Spain
- Deperias Kerre, University of Liège, Belgium
- Eduard Kamburjan, IT University of Copenhagen, Denmark
- Faezeh Ensan, Toronto Metropolitan University, Canada
- Fatemeh Bagheri, Saint Mary's University, Canada
- Franck Michel, CNRS, France
- Geethu Ebby, St. Mary's University, Canada
- Hande K"uq"uk McGinty, Kansas State University, Manhattan, KS, USA
- Hannah Kim, Temple University, USA
- Anastasia Dimou, KU Leuven, Belgium
- David Chaves-Fraga, University of Santiago de Compostela, Spain

Second International Workshop on Users and Knowledge Graphs (UKG), Ghent, Belgium, September 15, 2026
Co-located with the 22nd International Conference on Semantic Systems (SEMANTiCS 2026)
