

Preface

Companion of the Proceedings of the 13th Knowledge Capture Conference

K-CAP-C 2025

Dayton, Ohio, USA - December 10-12, 2025

This companion volume contains the contributions accepted to the K-CAP 2025 Posters & Demos Track of the 13th International Conference on Knowledge Capture (K-CAP 2025), held in Dayton, Ohio, USA, on December 10-12, 2025.

The Posters & Demos Track provided a venue for researchers and practitioners to showcase early-stage research, innovative prototypes, preliminary results, and practical applications related to knowledge capture. Topics of interest included knowledge acquisition, extraction, and modeling; ontologies and knowledge graphs; machine learning for knowledge capture; human-in-the-loop knowledge systems; interactive knowledge capture; explainable AI and knowledge; ethical considerations in knowledge systems; and applications of knowledge technologies in domains such as healthcare, education, and industry.

Submission and Review Process

The track received 12 submissions, all of which were accepted for inclusion in the K-CAP 2025 Companion Volume after peer review.

All submissions were reviewed by members of the Program Committee. Each submission received at least two reviews, and some submissions received up to four reviews. Reviewers assessed submissions with respect to novelty, technical soundness, relevance to K-CAP, clarity of presentation, and their potential to stimulate discussion during the session. Demo submissions were additionally assessed with respect to the maturity and interactivity of the presented system. The editors considered the reviewers' comments when making the final acceptance decisions.

The final abstract submission deadline was October 10, 2025, and author notification was scheduled for October 24, 2025. All deadlines were Anywhere on Earth (AoE). The conference took place on December 10-12, 2025.

We thank all authors for their contributions and the members of the Program Committee for their time, expertise, and constructive feedback.
